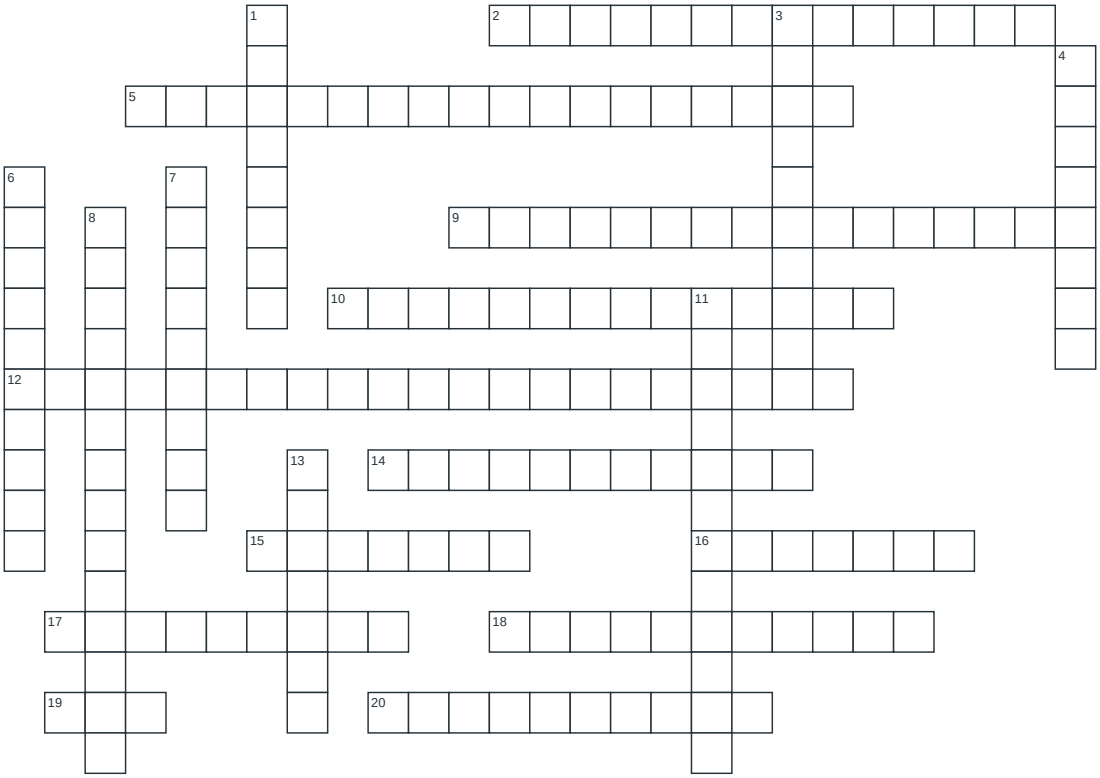
Cell Division: Mitosis and Meiosis Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

2. Organelle that modifies, sorts, and packages many proteins.

5. Process by which cells develop structures suited to particular functions.

9. Identical chromosome copies joined before they separate

10. Plant-cell compartment that stores water and helps maintain pressure.

12. Chromosome pair with the same genes at corresponding locations

14. Division of the cytoplasm into daughter cells

15. Nuclear division that usually preserves chromosome number

16. Membrane-bound organelle that contains most eukaryotic DNA.

17. Meiotic stage when homologous chromosomes pair and crossing over can occur

18. Organelle where photosynthesis occurs in plants and algae.

ACROSS (continued)

19. Molecule that stores hereditary information in most cells

20. Meiotic stage when homologous chromosome pairs align at the cell center

DOWN

1. Rigid outer layer that supports many plant, fungal, and bacterial cells.

3. Cell type that lacks a membrane-bound nucleus.

4. Cell structure that assembles proteins.

6. States that living things are made of cells and that cells come from existing cells.

7. Cell contents outside the nucleus and inside the plasma membrane.

8. Boundary that regulates exchange between a cell and its surroundings.

11. Exchange of DNA between nonsister chromatids of homologous chromosomes

13. Cell division that produces haploid cells from a diploid cell

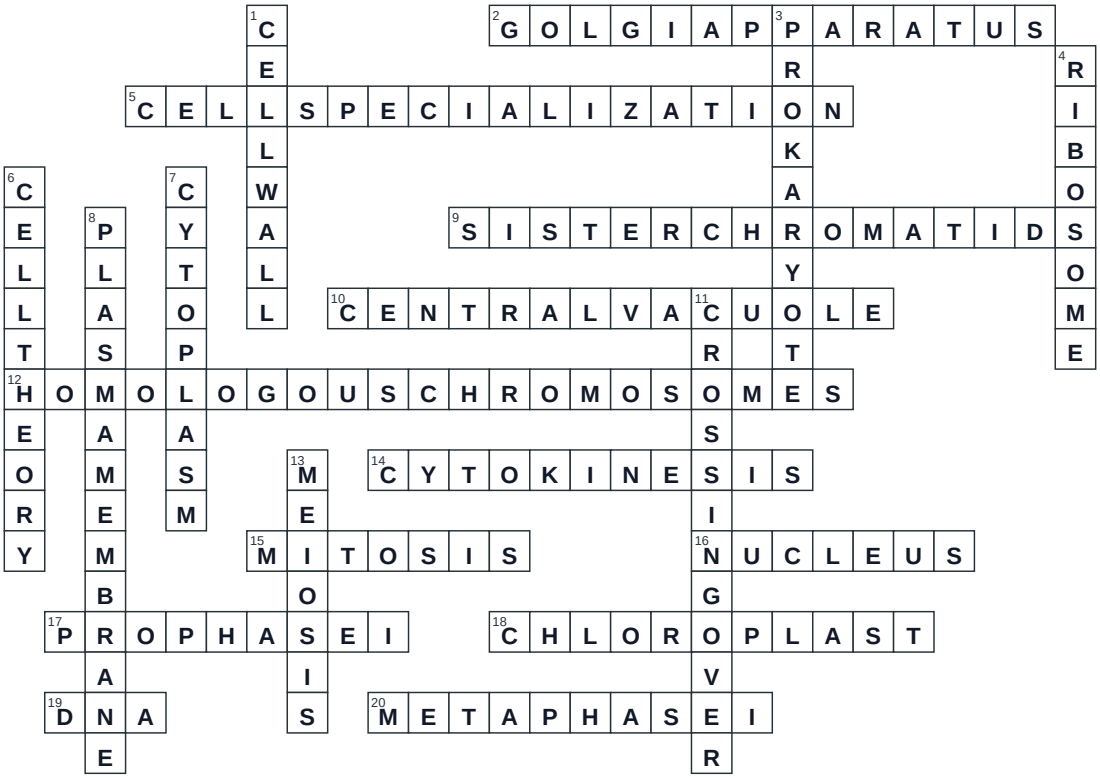
Cell Division: Mitosis and Meiosis Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

2. Golgi apparatus
5. Cell specialization
9. Sister Chromatids
10. Central vacuole
12. Homologous Chromosomes
14. Cytokinesis
15. Mitosis
16. Nucleus
17. Prophase I
18. Chloroplast
19. DNA

ACROSS (continued)

20. Metaphase I

DOWN

1. Cell wall
3. Prokaryote
4. Ribosome
6. Cell theory
7. Cytoplasm
8. Plasma membrane
11. Crossing Over
13. Meiosis
