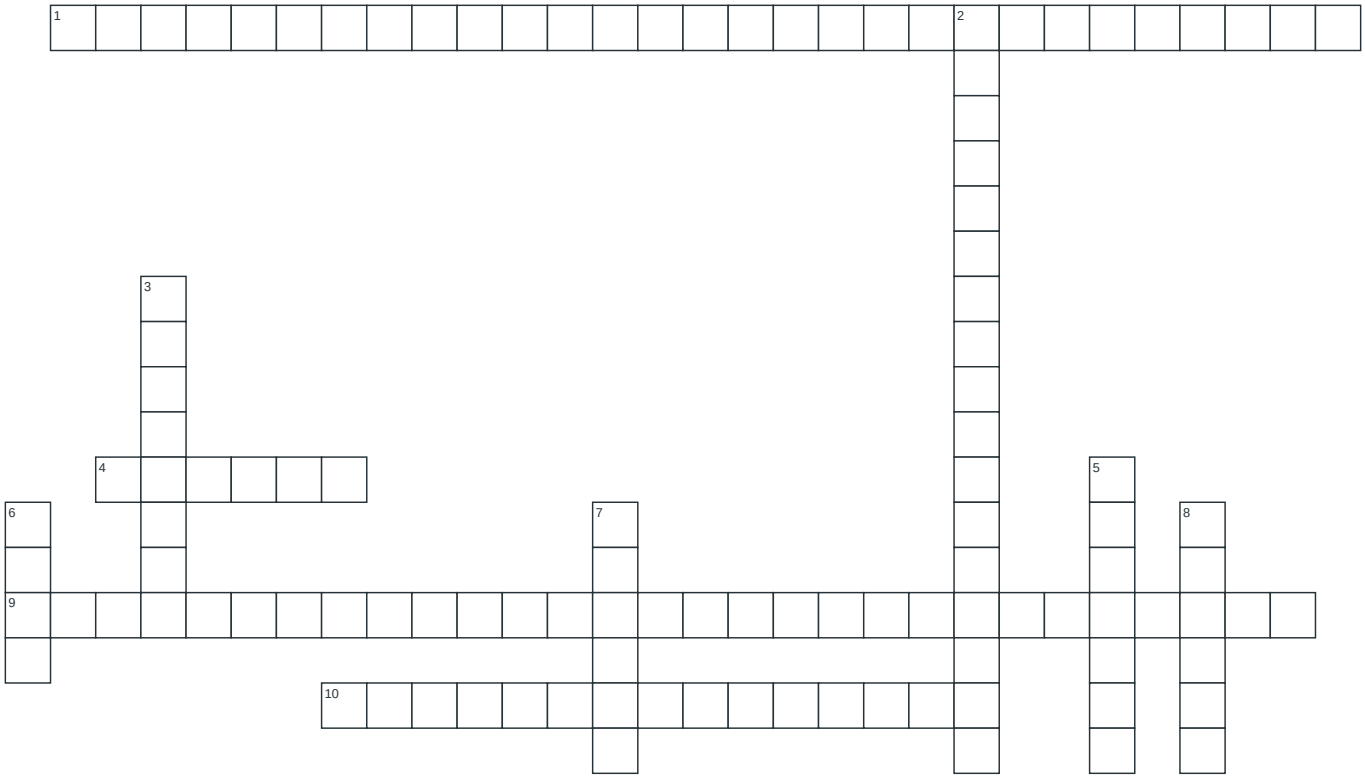
Immunity and Disease Crossword

Easy | 10 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. Two groups encounter the same pathogen; one group has relevant immune memory. What response is generally expected in that group

4. Organism that carries a pathogen between hosts.

9. Response that is part of innate immunity

10. Cells are central to many immune defenses

DOWN

2. An process results from a transmissible biological agent

DOWN (continued)

3. System that includes bones and provides structural support

5. Molecular feature recognized by immune receptors

6. Organ and protective barrier that forms much of the integumentary system

7. Immune cells can develop into antibody-secreting cells

8. Group of similar cells and associated material performing related functions.

Immunity and Disease Crossword

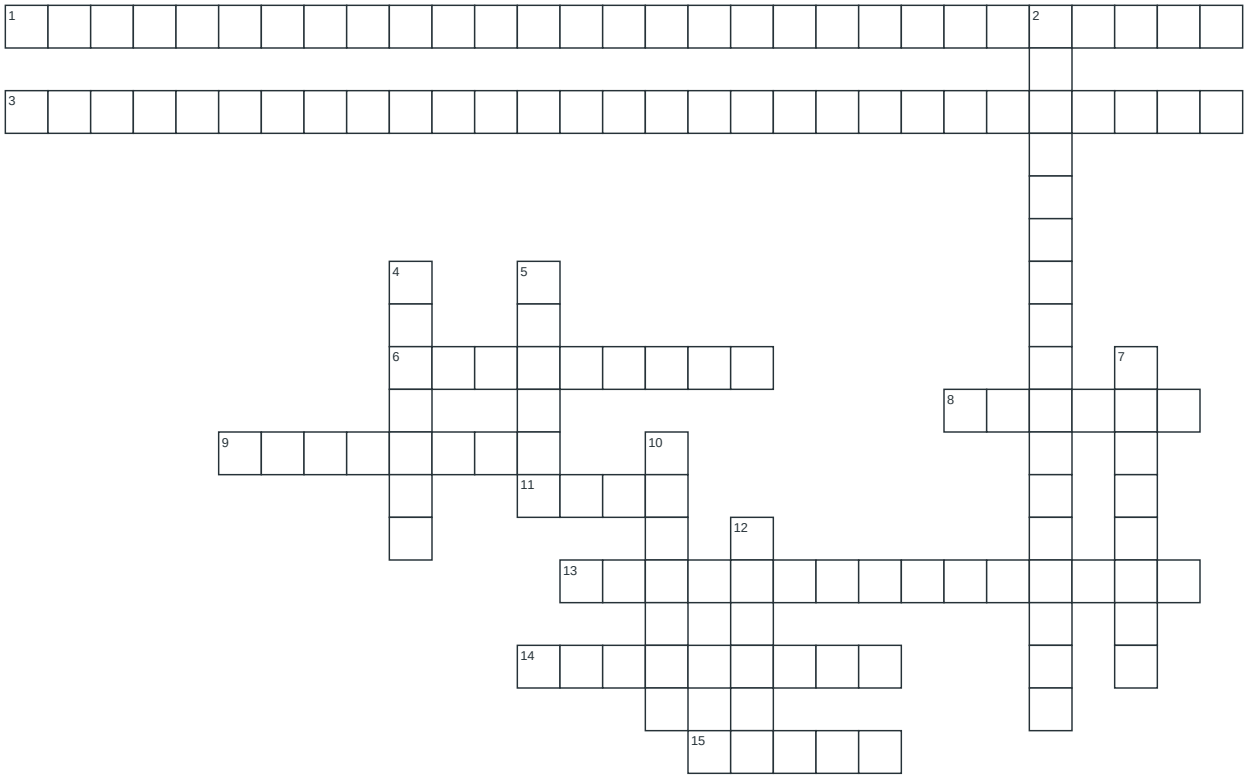
Medium | 15 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. Response that is part of innate immunity

3. Two groups encounter the same pathogen; one group has relevant immune memory. What response is generally expected in that group

6. Break down food and absorb nutrients

8. Group of similar cells and associated material performing related functions.

9. System that includes bones and provides structural support

11. Organ and protective barrier that forms much of the integumentary system

13. Cells are central to many immune defenses

ACROSS (continued)

14. Absorbed nutrients enter transport pathways supplying tissues

15. Structure composed of multiple tissues working together.

DOWN

2. An process results from a transmissible biological agent

4. Organs filter blood and help regulate water and salts

5. Immune cells can develop into antibody-secreting cells

7. System that includes muscles that move the skeleton

10. Molecular feature recognized by immune receptors

12. Organism that carries a pathogen between hosts.

Immunity and Disease Crossword

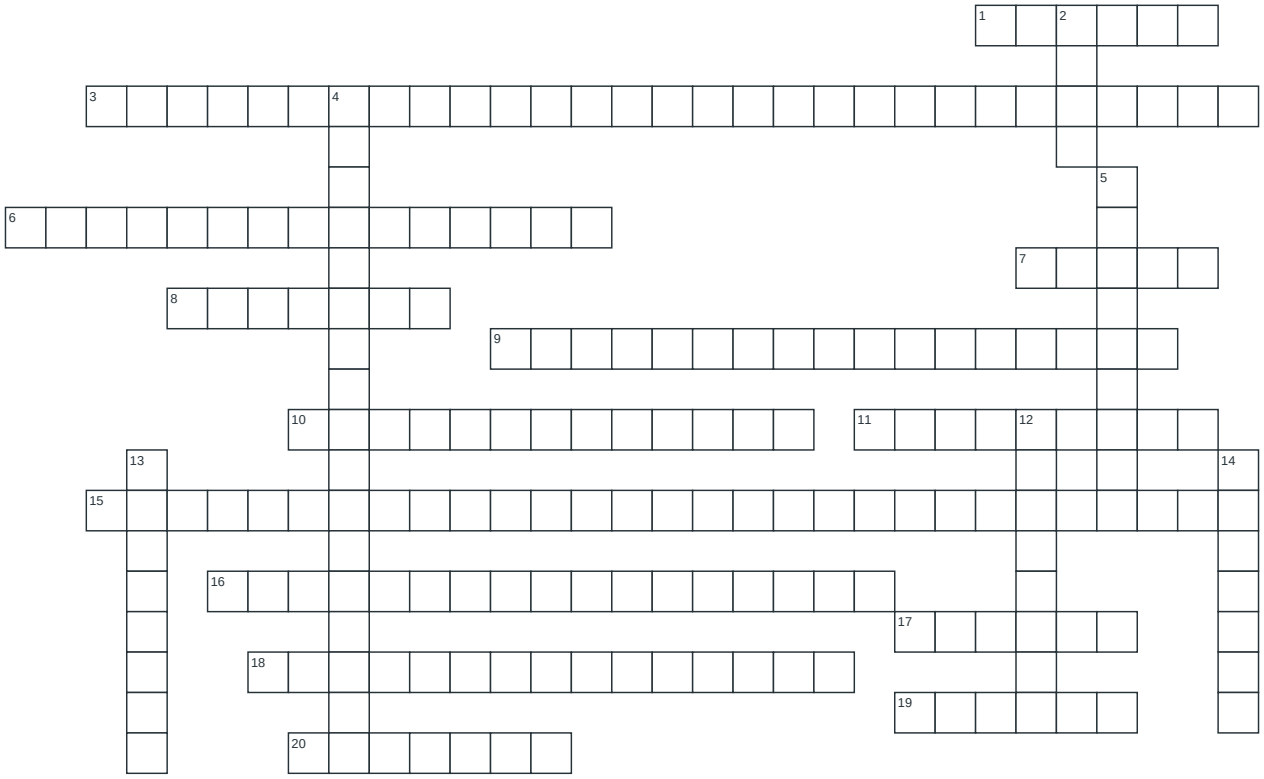
Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. Group of similar cells and associated material performing related functions.
3. Response that is part of innate immunity
6. Returns excess tissue fluid to circulation
7. Structure composed of multiple tissues working together.
8. Organs filter blood and help regulate water and salts
9. An process results from a transmissible biological agent
10. A model includes protection, sensation, and sweat release. Which system does it chiefly represent
11. Break down food and absorb nutrients
15. Two groups encounter the same pathogen; one group has relevant immune memory. What response is generally expected in that group
16. Body system that transports blood, gases, nutrients, and wastes.

ACROSS (continued)

17. Organism that carries a pathogen between hosts.
18. Cells are central to many immune defenses
19. Immune cells can develop into antibody-secreting cells
20. Molecular feature recognized by immune receptors

DOWN

2. Organ and protective barrier that forms much of the integumentary system
4. Shortening or tension development that can move a bone at a joint.
5. Absorbed nutrients enter transport pathways supplying tissues
12. System that includes bones and provides structural support
13. System that includes muscles that move the skeleton
14. Nerve signals are often rapid; hormonal effects can be more widespread
