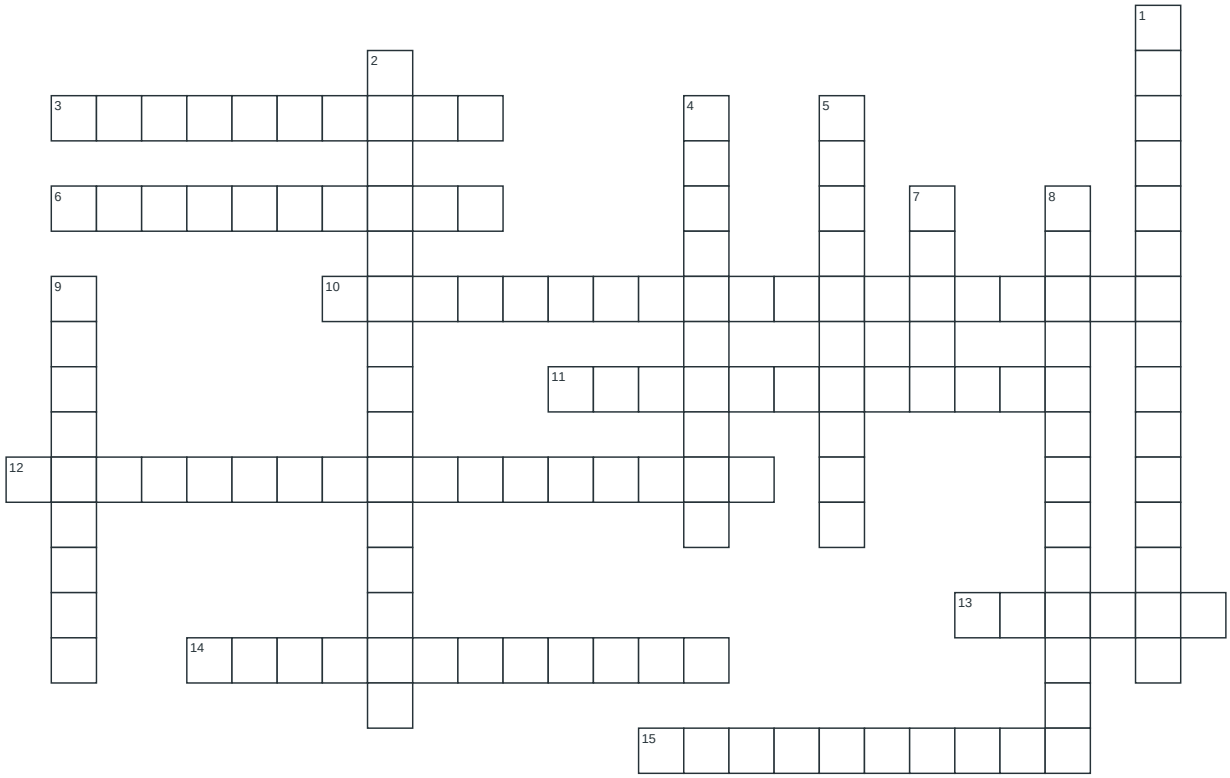
Light and Optics Crossword

Medium | 15 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

3. Point where parallel rays converge after passing through a converging lens.
6. Returns some light into the original medium
10. Wave of changing electric and magnetic fields that can travel through a vacuum
11. Image at a location from which light rays appear to originate.
12. Reflection in many directions from a rough surface.
13. Region where light is blocked by an object.
14. Object that blocks light from passing through it.
15. Line perpendicular to a surface at the point where a ray strikes.

DOWN

1. Rule that the incident and reflected angles are equal when measured from the normal.
2. Range of electromagnetic wavelengths detectable by human vision.
4. A change in propagation direction associated with a change in wave speed
5. Lens generally converges parallel rays in air
7. Transparent optical object that can separate light by wavelength-dependent refraction.
8. Distance from an optical element to the image it forms.
9. An image formed where light rays actually converge

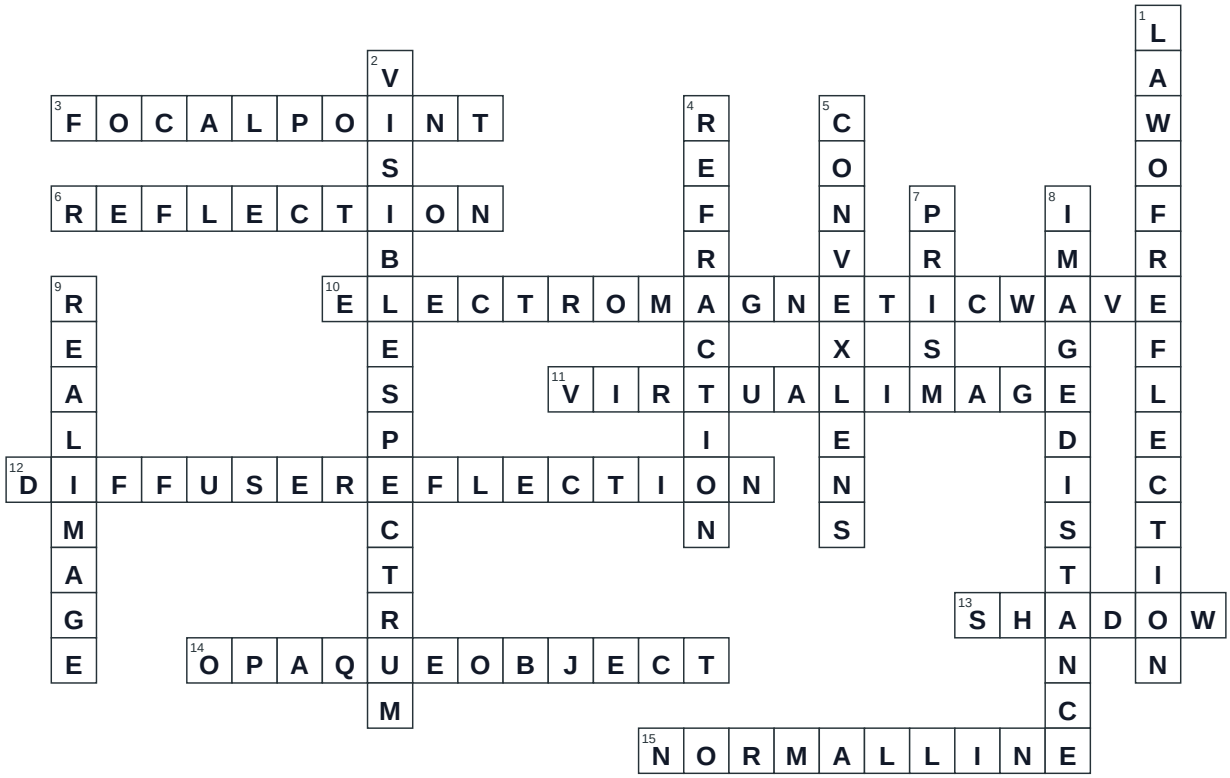
Light and Optics Crossword

Medium | 15 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

3. Focal point
6. Reflection
10. Electromagnetic Wave
11. Virtual image
12. Diffuse reflection
13. Shadow
14. Opaque object
15. Normal line

DOWN

1. Law of reflection
2. Visible spectrum
4. Refraction
5. Convex Lens
7. Prism
8. Image distance
9. Real Image
