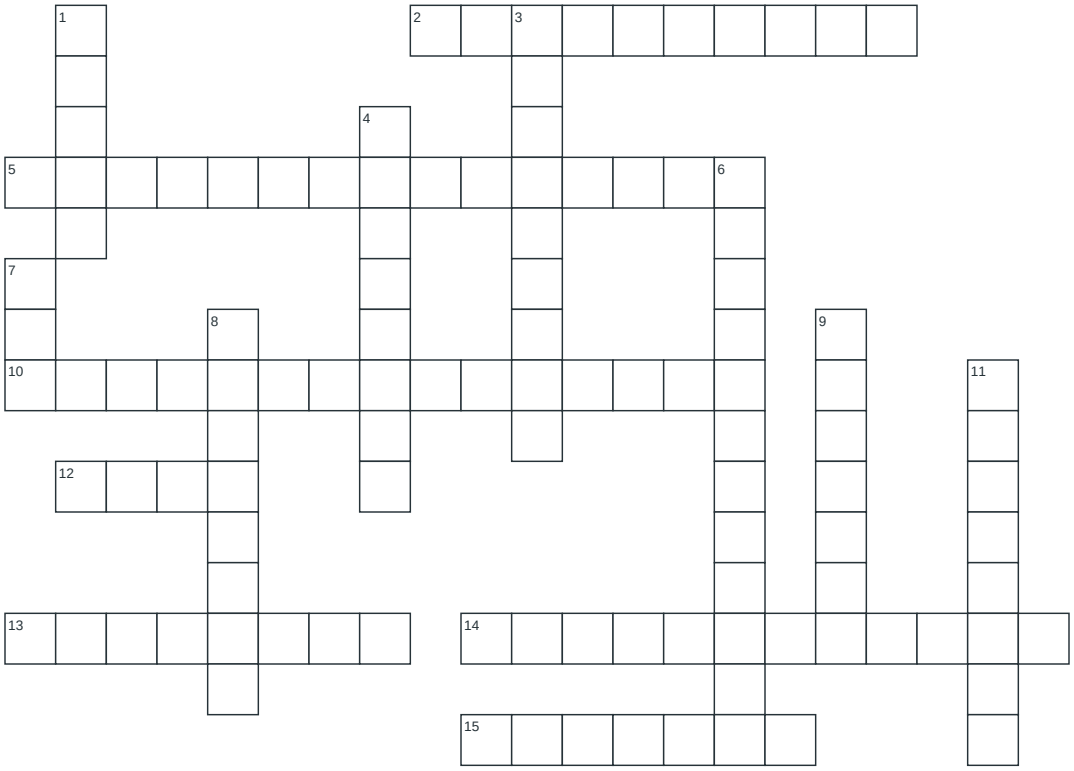
Projectile Motion Crossword

Medium | 15 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

2. Approximate value is commonly used for gravitational acceleration near Earth's surface

5. SI-derived unit commonly used to measure speed or velocity.

10. At equal launch and landing heights with no drag and fixed launch speed, which angle gives maximum range

12. State in which position does not change relative to a chosen reference point.

13. The total length of a traveled path

14. Change in velocity per unit time.

15. In the ideal near-Earth projectile model, which force acts after launch when air resistance is neglected

DOWN

1. Quantity that is a scalar

3. Orientation of motion, needed to describe a velocity vector.

4. The vector sum of all forces acting on an object

6. The directed change from initial to final position

7. Relationship that expresses Newton's second law for constant mass

8. At the highest point of an upward launch, which velocity component is zero

9. Resistance to changes in motion

11. Shape is an ideal projectile's path under constant downward gravity

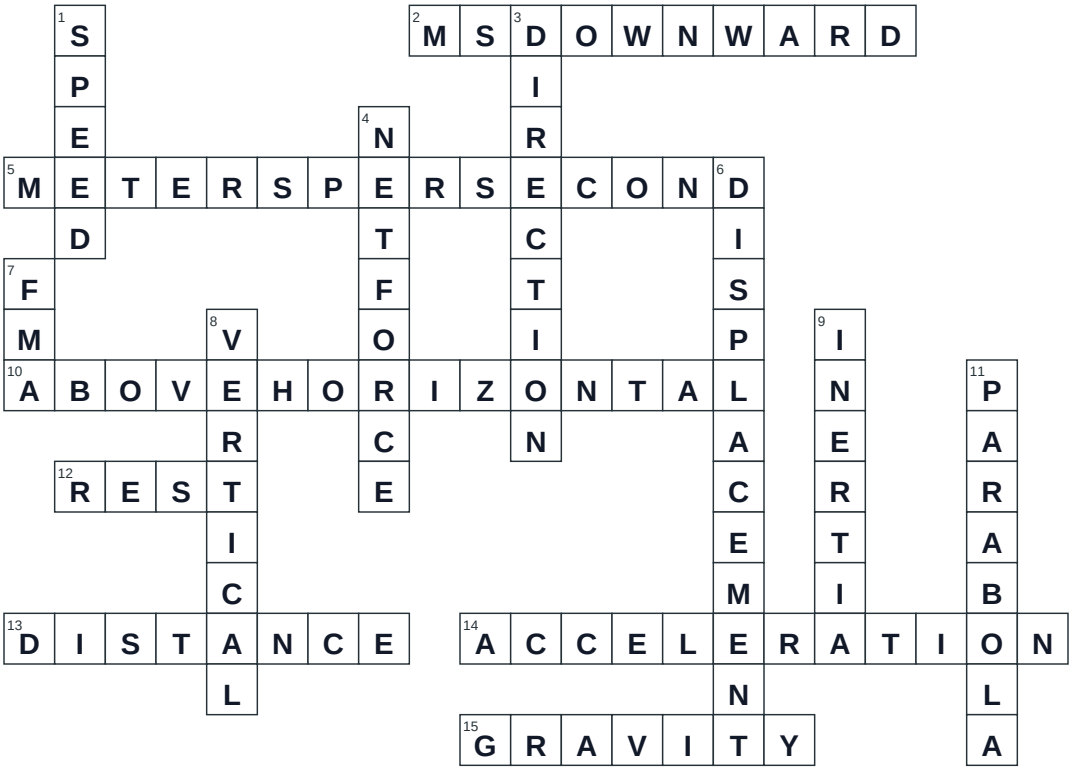
Projectile Motion Crossword

Medium | 15 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

2. 9.8 M/s² Downward
5. Meters per second
10. 45° Above Horizontal
12. Rest
13. Distance
14. Acceleration
15. Gravity

DOWN

1. Speed
3. Direction
4. Net Force
6. Displacement
7. F = ma
8. Vertical
9. Inertia
11. Parabola
