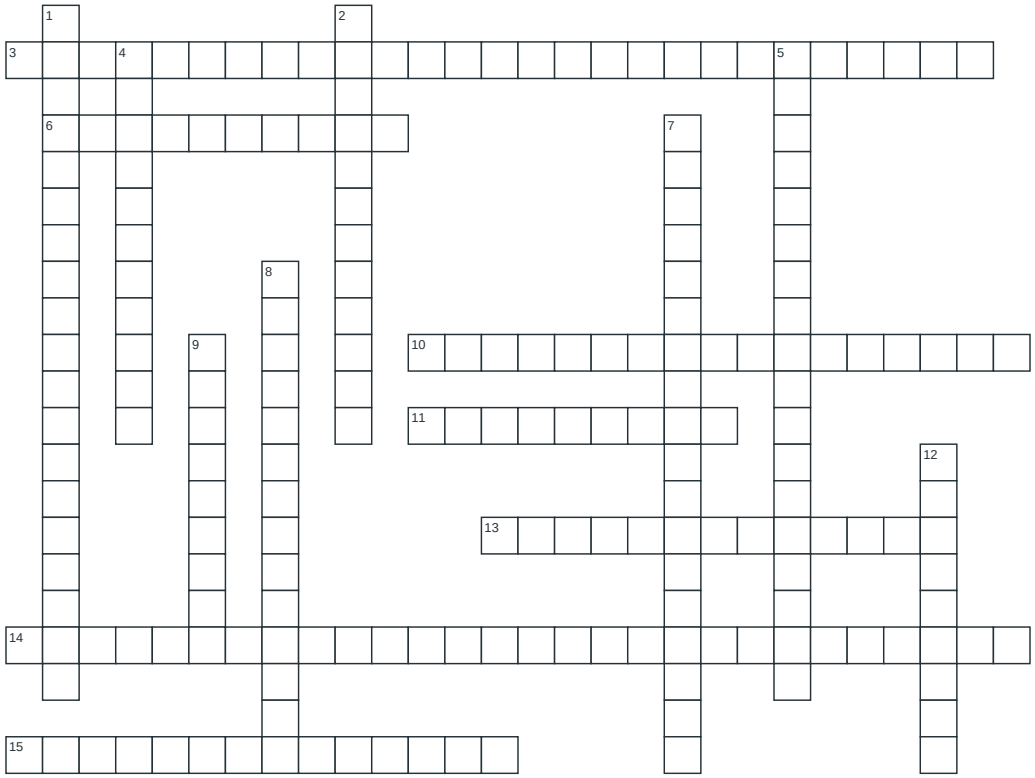
Static Electricity Crossword

Medium | 15 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

3. Change in stored energy per unit charge between two locations.

6. Relationship describing electric force as dependent on charge and separation.

10. Stored energy per unit charge at a location in an electric field.

11. Connection that lets charge move between an object and Earth.

13. The repulsive force decreases

14. Net charge is conserved in an isolated system

15. Net electric charge resulting when an object has fewer electrons than protons.

DOWN

1. A material in which charge does not move freely through the bulk

2. Redistribution of charge within an object without necessarily changing its net charge.

4. Becomes one-fourth as large

5. Attractive or repulsive force between electric charges.

7. Principle that total electric charge in an isolated system remains constant.

8. Net electric charge resulting when an object has more electrons than protons.

9. Material in which electric charge does not move freely through the bulk.

12. Particles usually move between objects during static charging

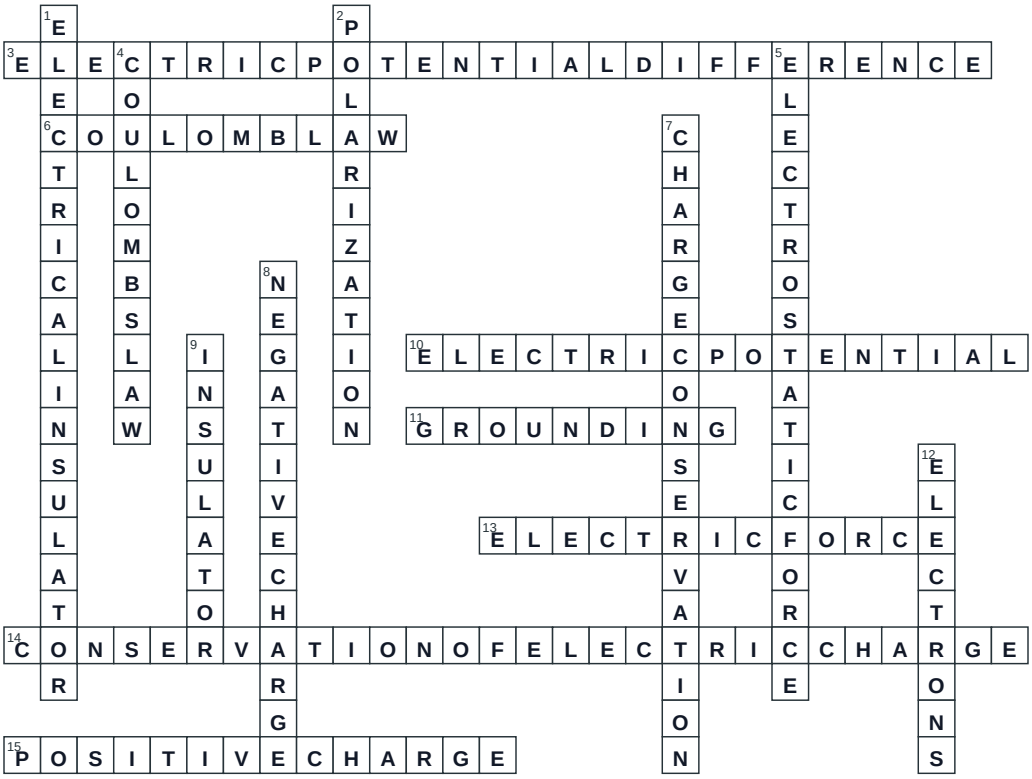
Static Electricity Crossword

Medium | 15 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

3. Electric potential difference
6. Coulomb law
10. Electric potential
11. Grounding
13. Electric Force
14. Conservation Of Electric Charge
15. Positive charge

DOWN

1. Electrical Insulator
2. Polarization
4. Coulomb’s Law
5. Electrostatic force
7. Charge conservation
8. Negative charge
9. Insulator
12. Electrons
