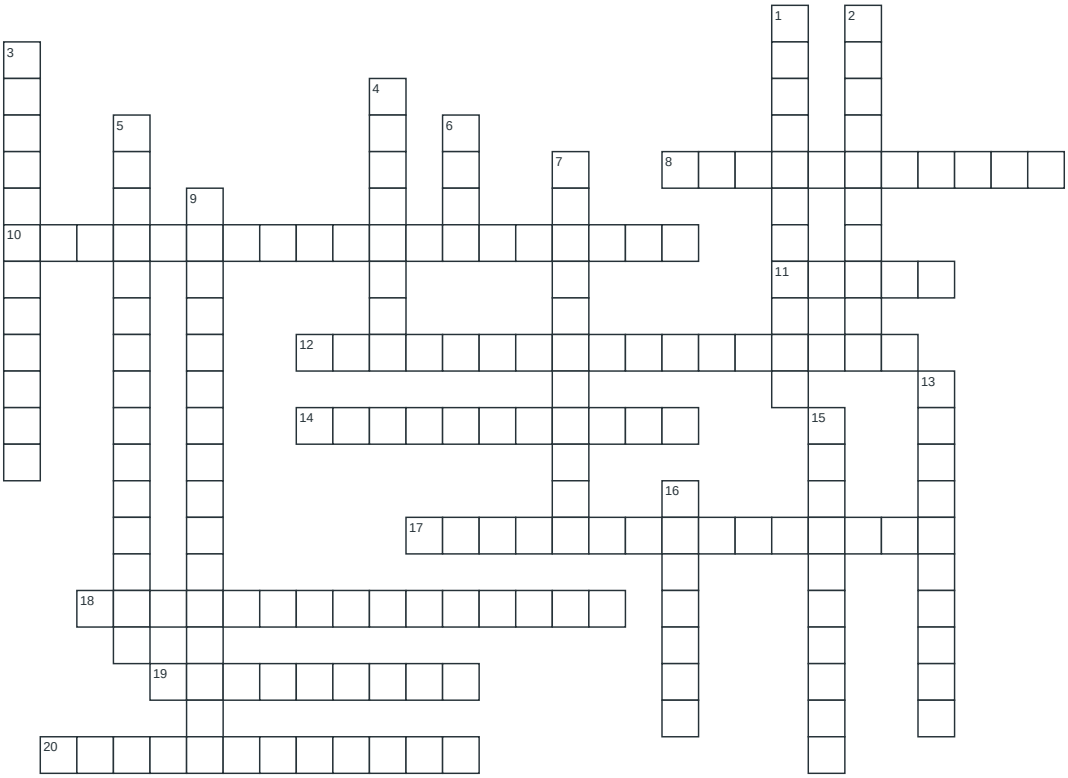
Scientific Models Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

8. Relationship in which variables change together; alone it does not prove cause.
10. Factor deliberately changed by the investigator.
11. One repetition of an experimental procedure.
12. A representation using mathematical relationships
14. Repeating an investigation to check whether results are consistent.
17. A representation of how components and processes relate
18. A condition or simplification accepted for constructing the model
19. Ordered steps used to carry out an investigation.
20. Comparison group that does not receive the tested treatment.

DOWN

1. Information gathered with senses or scientific instruments.

DOWN (continued)

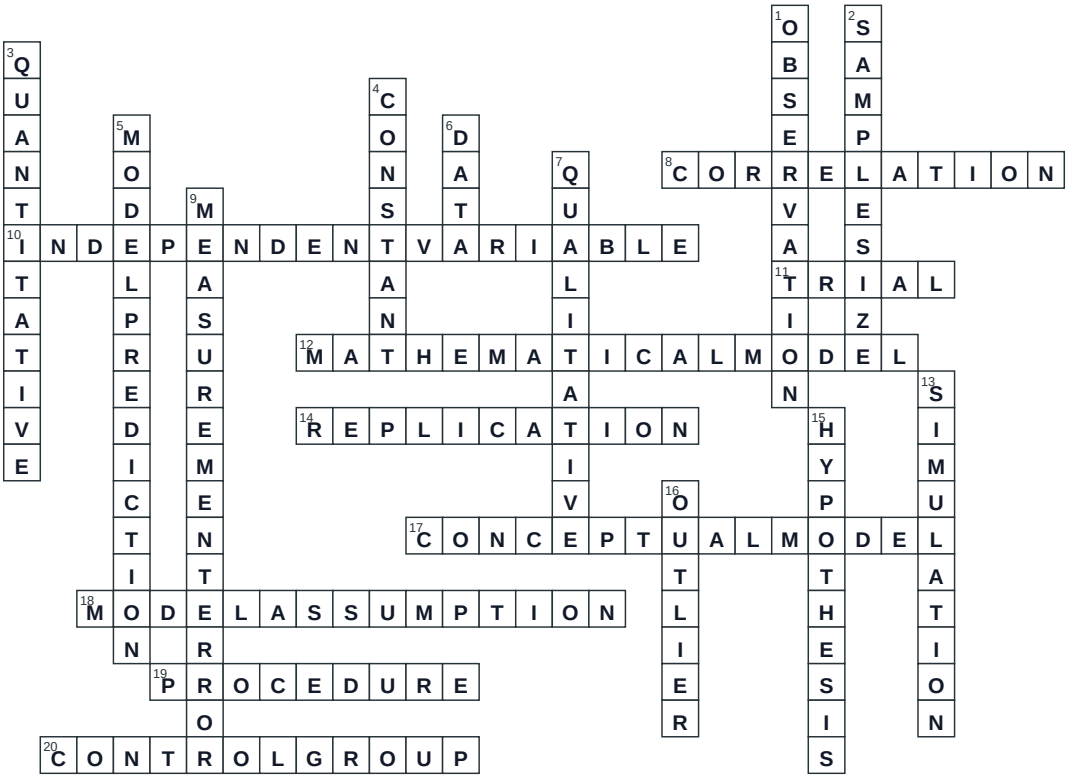
2. Number of individuals or observations included in a study.
3. Describes data expressed as numbers or measurements.
4. Condition kept the same across comparison groups.
5. An expected outcome derived from the model
6. Recorded observations and measurements from an investigation.
7. Describes observations about qualities rather than numerical amounts.
9. Difference between a measured value and the quantity’s true value.
13. A representation that imitates a system's behavior over time or under conditions
15. Testable proposed explanation or prediction.
16. Data value unusually far from the rest of a set.

Scientific Models Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

8. Correlation
10. Independent Variable
11. Trial
12. Mathematical Model
14. Replication
17. Conceptual Model
18. Model Assumption
19. Procedure
20. Control Group

DOWN

1. Observation
2. Sample size
3. Quantitative
4. Constant
5. Model Prediction
6. Data
7. Qualitative
9. Measurement Error
13. Simulation
15. Hypothesis
16. Outlier
