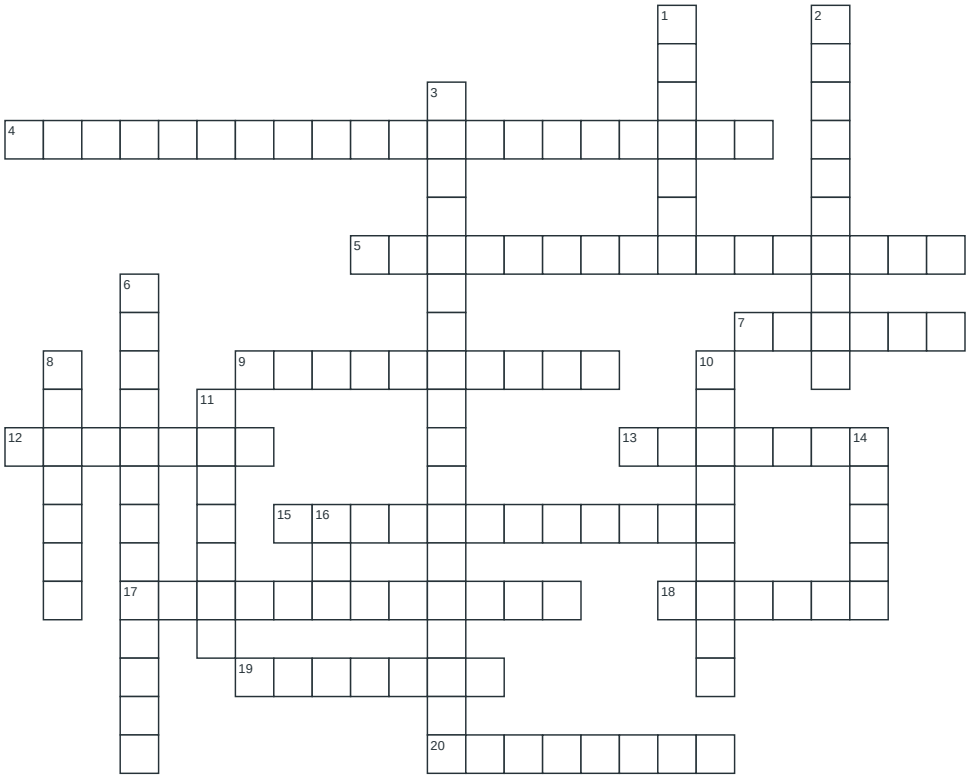
Separation Techniques Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

4. Condition in which positive and negative charges balance.

5. An insoluble solid settles beneath water. Which simple method can remove most of the water without filtering

7. Subatomic particle that carries a positive electric charge

9. The maximum amount that can dissolve under specified conditions

12. Subatomic particle that has no electric charge

13. Membrane-bound organelle that contains most eukaryotic DNA.

15. Separation method based on differences in boiling points

17. Change from water vapor to liquid droplets.

18. State generally has a fixed volume but takes the shape of its container

19. Two or more substances combined without a fixed chemical composition

ACROSS (continued)

20. Homogeneous mixture in which a solute is dispersed in a solvent.

DOWN

1. Definition of the material left on filter paper commonly called

2. Method that separates solid particles from a fluid using a barrier

3. Mixture separation can preserve substances' chemical identities

6. Electron locations are described by regions of probability

8. Separation method that sorts solid particles by size

10. Separation method that pours liquid away from settled solids

11. process forms vapor bubbles throughout the liquid under suitable conditions

14. State generally has a fixed volume and a fixed shape

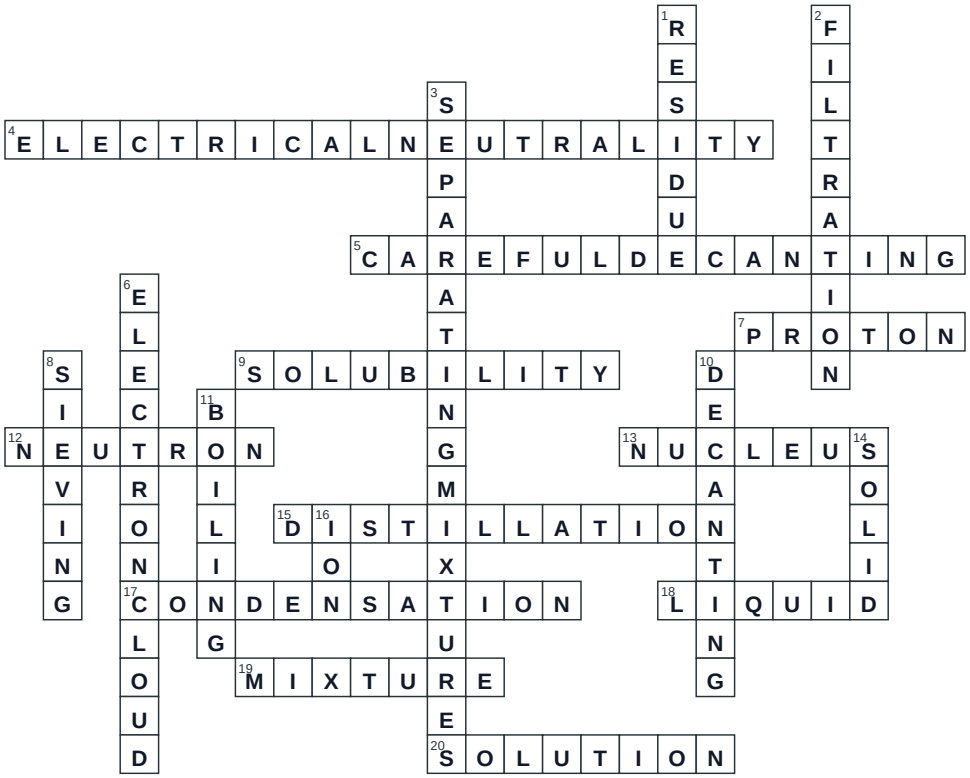
16. Atom or group of atoms with a net electric charge.

Separation Techniques Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

4. Electrical neutrality
5. Careful Decanting
7. Proton
9. Solubility
12. Neutron
13. Nucleus
15. Distillation
17. Condensation
18. Liquid
19. Mixture
20. Solution

DOWN

1. Residue
2. Filtration
3. Separating Mixtures
6. Electron Cloud
8. Sieving
10. Decanting
11. Boiling
14. Solid
16. Ion
