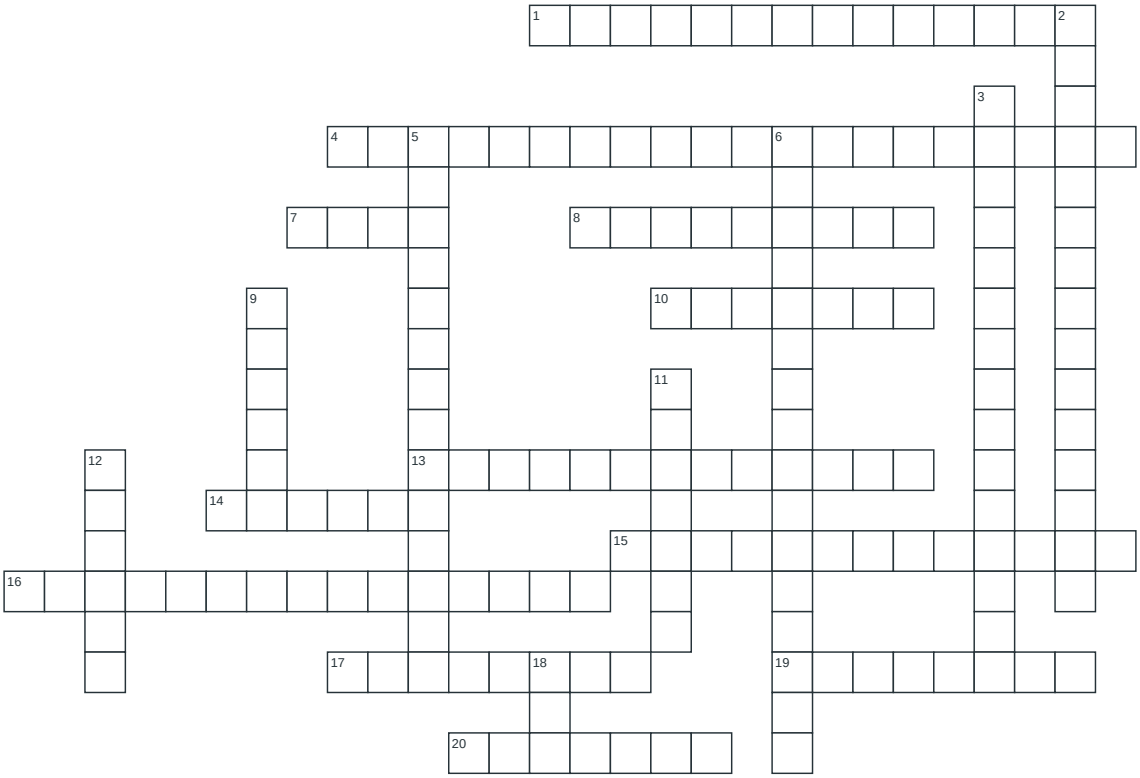
Electric Circuits Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. Material path that allows charge to flow through a circuit.
4. Property that opposes electric current in a material or component
7. Protective device that opens a circuit when current is too high.
8. Instrument connected in parallel to measure potential difference.
10. Electric potential difference between two points
13. One of multiple paths through a parallel circuit.
14. Component that opens or closes a circuit path.
15. A circuit with one path through its components
16. The rate of electric charge flow
17. Condition in which current exceeds a circuit or cord rating.

ACROSS (continued)

19. Circuit component designed to provide electrical resistance.
20. Instrument connected in series to measure current.

DOWN

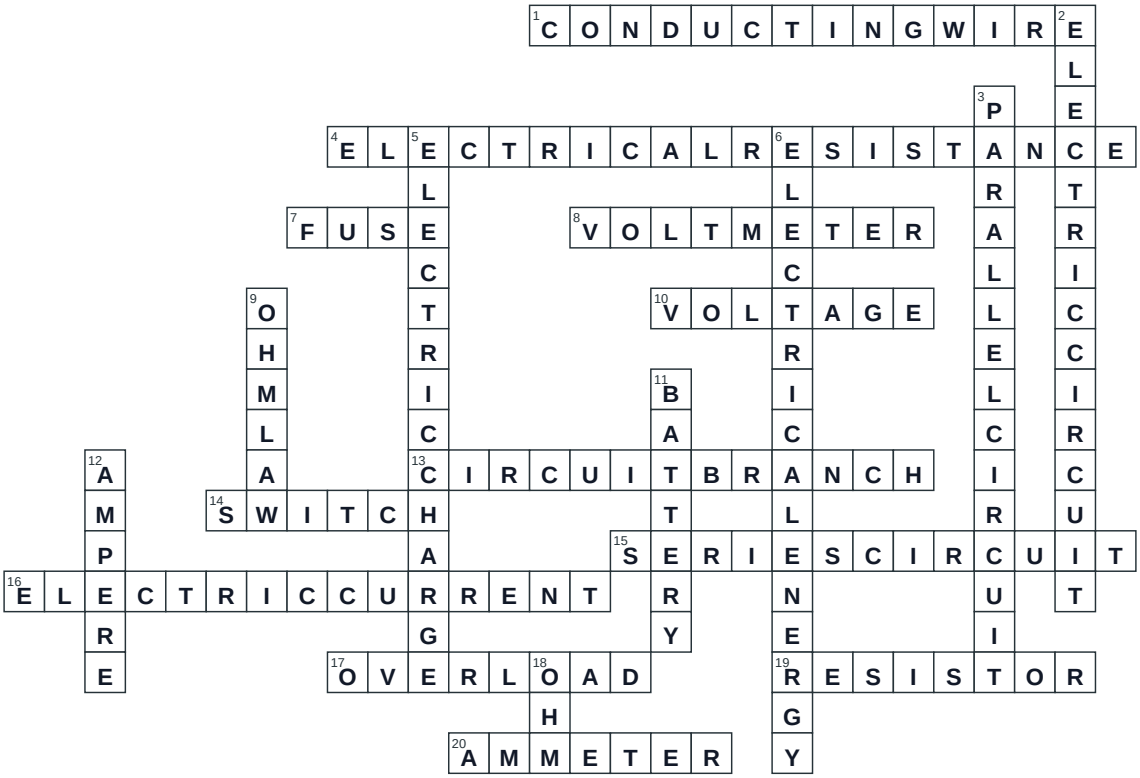
2. Connected path through which electric charge can flow.
3. A circuit containing more than one branch for current
5. Physical property that causes electric interactions.
6. Energy transferred by electric charges in a circuit.
9. Relationship among voltage, current, and resistance for an ohmic component.
11. Source that maintains a potential difference using chemical reactions.
12. Unit that measures current
18. Unit that measures resistance

Electric Circuits Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

1. Conducting wire
4. Electrical Resistance
7. Fuse
8. Voltmeter
10. Voltage
13. Circuit branch
14. Switch
15. Series Circuit
16. Electric Current
17. Overload
19. Resistor

ACROSS (continued)

20. Ammeter

DOWN

2. Electric circuit
3. Parallel Circuit
5. Electric charge
6. Electrical energy
9. Ohm law
11. Battery
12. Ampere
18. Ohm
