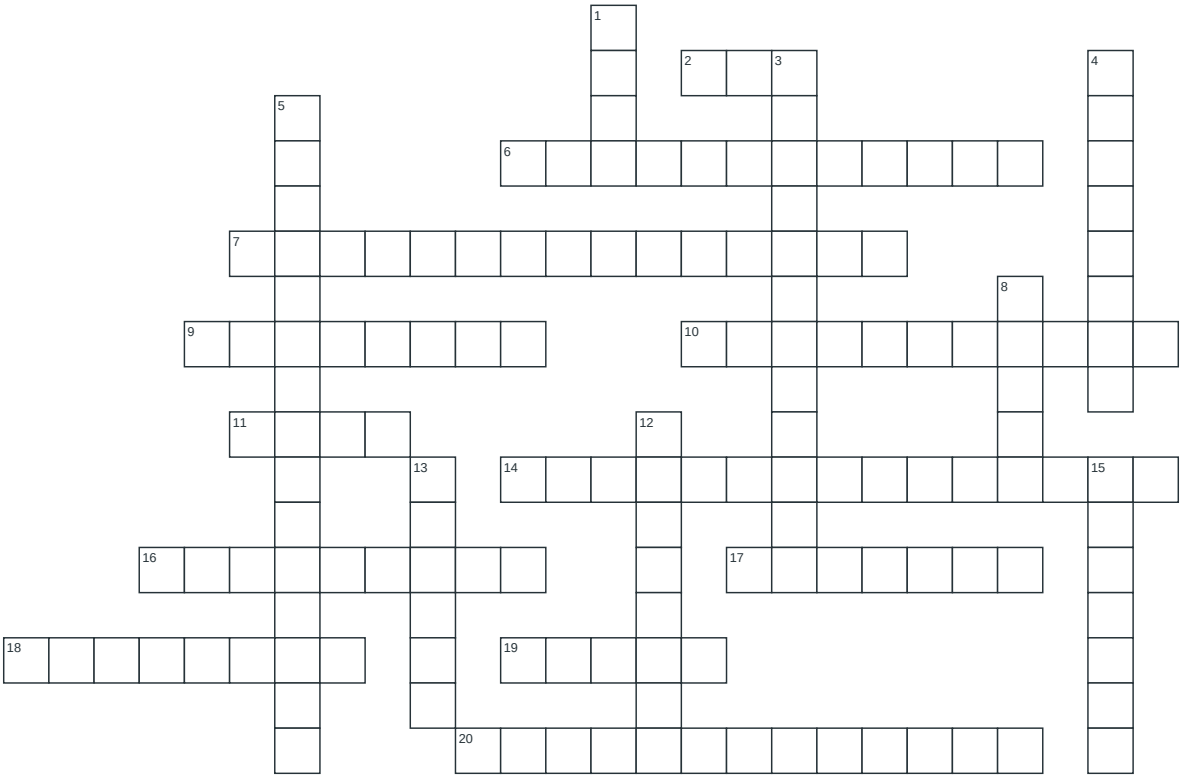
Forces and Newton's Laws Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

2. Relationship that expresses Newton's second law for constant mass

6. The directed change from initial to final position

7. Equal and opposite interaction forces acting on different objects

9. The total length of a traveled path

10. Force that is a surface's push perpendicular to that surface

11. State in which position does not change relative to a chosen reference point.

14. Energy associated with position in a gravitational field

16. Orientation of motion, needed to describe a velocity vector.

17. Resistance to changes in motion

18. Opposes the relative sliding of contacting surfaces

ACROSS (continued)

19. Quantity that is a scalar

20. Energy of motion; for a fixed mass it varies with the square of speed.

DOWN

1. Measure of the amount of matter in an object

3. Change in velocity per unit time.

4. The vector sum of all forces acting on an object

5. SI-derived unit commonly used to measure speed or velocity.

8. Definition of the SI unit of energy and work

12. Exerts a force that changes the passenger's motion

13. The gravitational force acting on an object

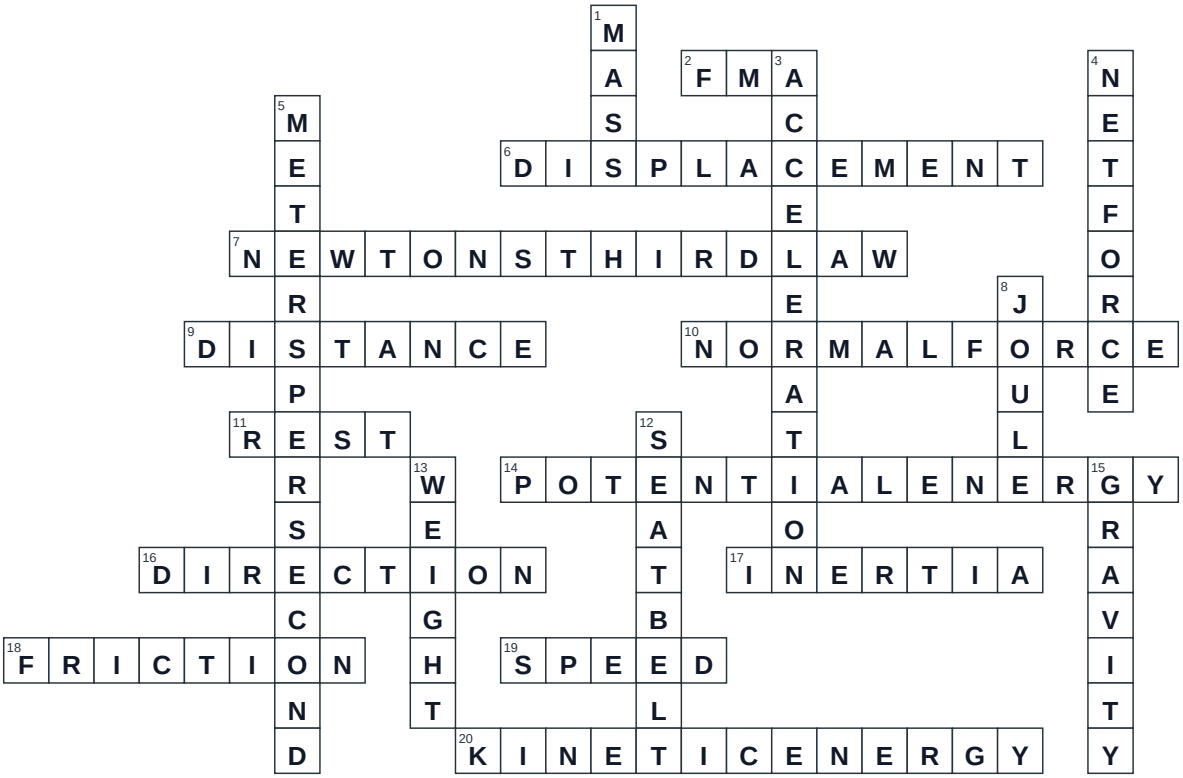
15. In the ideal near-Earth projectile model, which force acts after launch when air resistance is neglected

Forces and Newton's Laws Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

2. F = ma
6. Displacement
7. Newton's Third Law
9. Distance
10. Normal Force
11. Rest
14. Potential Energy
16. Direction
17. Inertia
18. Friction
19. Speed

ACROSS (continued)

20. Kinetic energy

DOWN

1. Mass
3. Acceleration
4. Net Force
5. Meters per second
8. Joule
12. Seat Belt
13. Weight
15. Gravity
