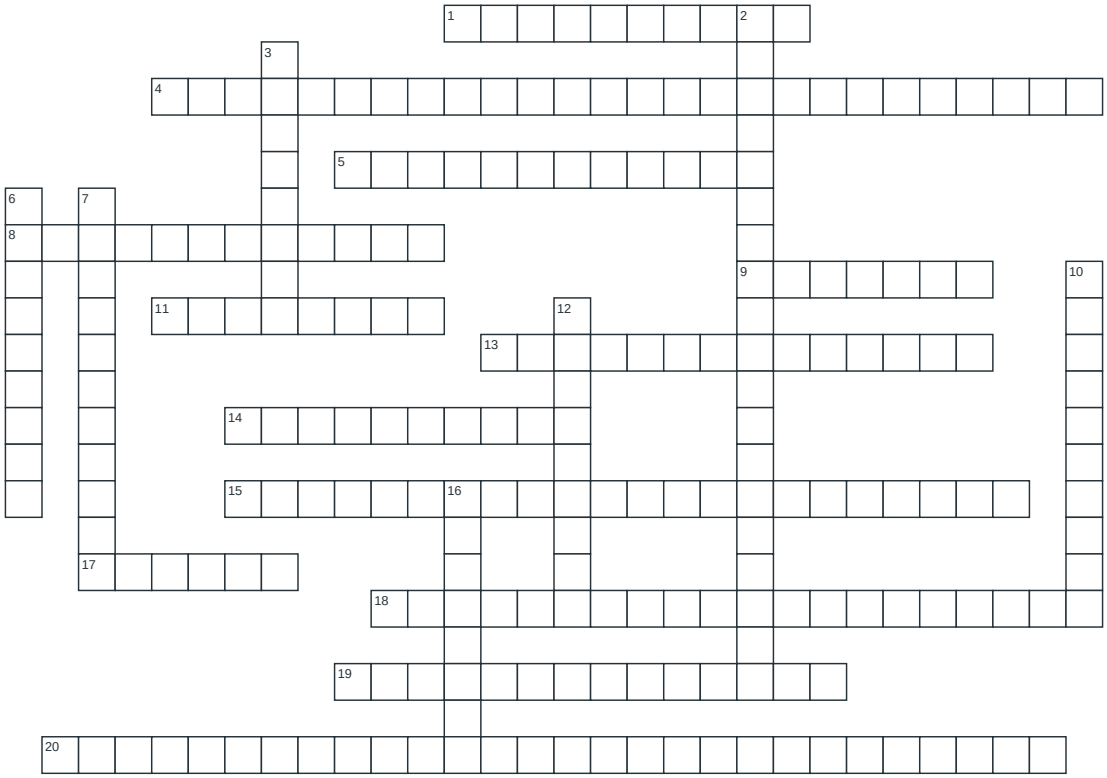
# Groundwater and Watersheds Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



## ACROSS

**1.** Difference in height between high tide and low tide.
**4.** Definition of an ocean current
**5.** Movement of water from the ground surface into soil or rock.
**8.** Ability of a material to allow fluids to pass through connected spaces
**9.** Permeable geologic unit that stores and transmits groundwater
**11.** Streamflow supplied mainly by groundwater between precipitation events.
**13.** High land that separates neighboring watersheds
**14.** Upper surface of the saturated groundwater zone
**15.** A watershed loses vegetation and gains extensive pavement. What change is generally expected after a storm
**17.** Water that flows over land toward streams or other drainage.
**18.** Movement of groundwater into streams, springs, or other surface waters.

## ACROSS (continued)

**19.** Apparent deflection of moving air or water due to Earth's rotation.
**20.** Nutrient-rich deep water reaches a sunny surface region. What response is plausible if other conditions are suitable

## DOWN

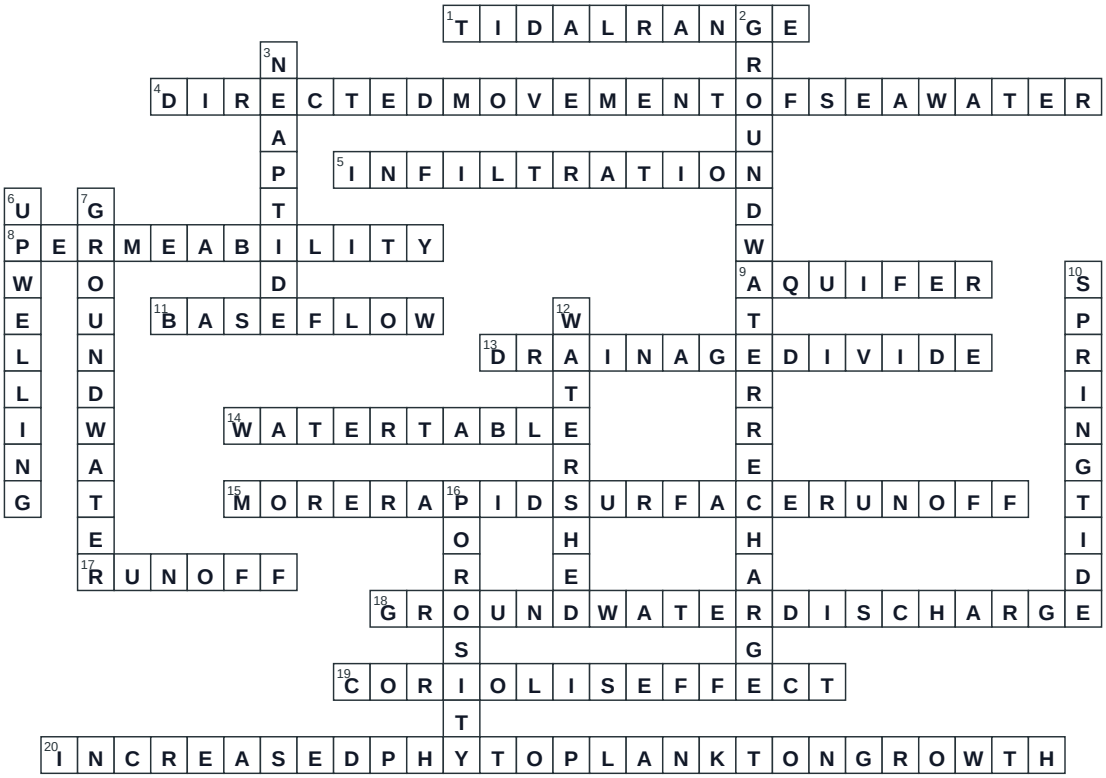
**2.** Water entering and replenishing an aquifer
**3.** Tide with a small tidal range near first- or third-quarter moon.
**6.** Rise of deeper, nutrient-rich water toward the ocean surface.
**7.** Water within connected pores and fractures below the water table
**10.** Tide with a large tidal range near new or full moon.
**12.** Area of land that drains water to a common outlet.
**16.** Fraction of a material's volume made up of open spaces.

# Groundwater and Watersheds Crossword

Hard | 20 clues | Teacher Answer Key

### TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



## ACROSS

**1.** Tidal range
**4.** Directed Movement Of Seawater
**5.** Infiltration
**8.** Permeability
**9.** Aquifer
**11.** Base flow
**13.** Drainage Divide
**14.** Water Table
**15.** More Rapid Surface Runoff
**17.** Runoff
**18.** Groundwater discharge

## ACROSS (continued)

**19.** Coriolis effect
**20.** Increased Phytoplankton Growth

## DOWN

**2.** Groundwater Recharge
**3.** Neap tide
**6.** Upwelling
**7.** Groundwater
**10.** Spring tide
**12.** Watershed
**16.** Porosity
