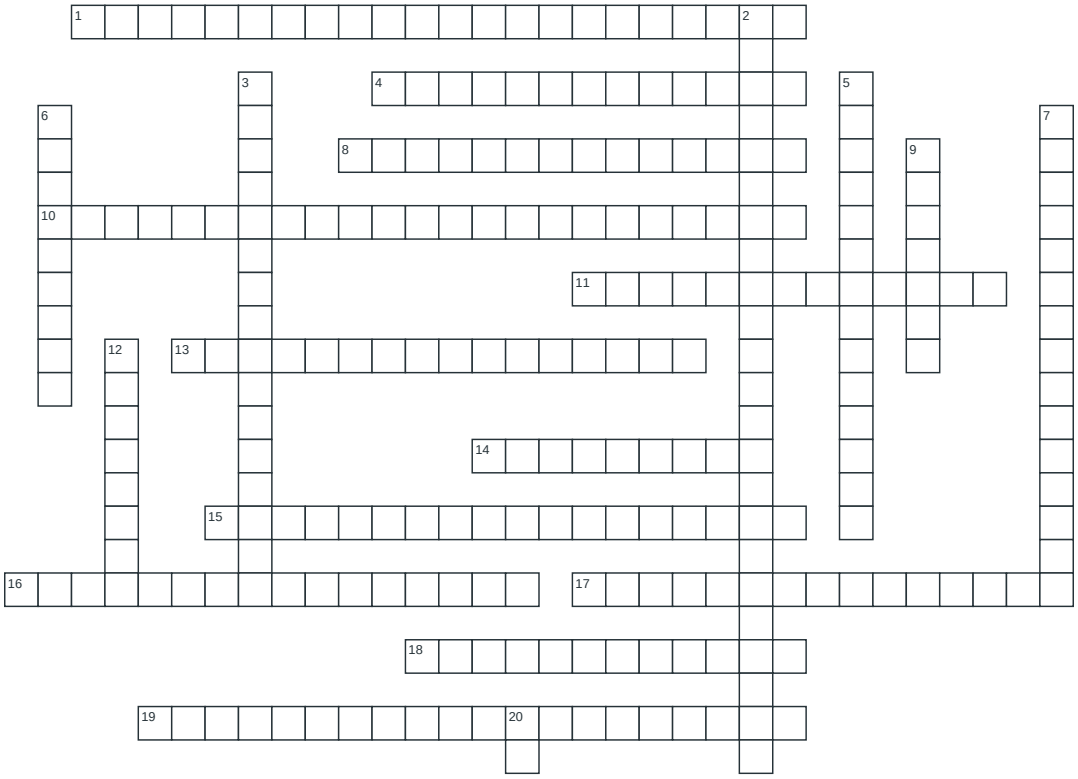
Water Quality Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. A substance or energy input capable of environmental harm

4. Collection of water in a way designed to represent a place and time.

8. Nutrient enrichment that can lead to excessive algae and low oxygen.

10. Estimate of oxygen used by microbes as they decompose organic matter

11. Defined criterion used to assess water for a particular use.

13. Increase in contaminant concentration at higher trophic levels.

14. Dissolved nutrient that can contribute to eutrophication.

15. Organism measured to assess possible pathogen contamination.

16. Substance or organism in water that may affect its quality or uses.

ACROSS (continued)

17. Oxygen gas in water that is available to aquatic organisms

18. The presence and amount of electrically conducting dissolved ions

19. Pollution discharged from a single identifiable location.

DOWN

2. Pollution entering from diffuse sources across an area.

3. A harmful alteration of environmental temperature, often in receiving water

5. Possible contamination associated with fecal material

6. Cloudiness caused by suspended particles

7. Buildup of a substance in an organism over time.

9. Dissolved nutrient that can contribute to excessive aquatic plant growth.

12. A reference condition used for comparison

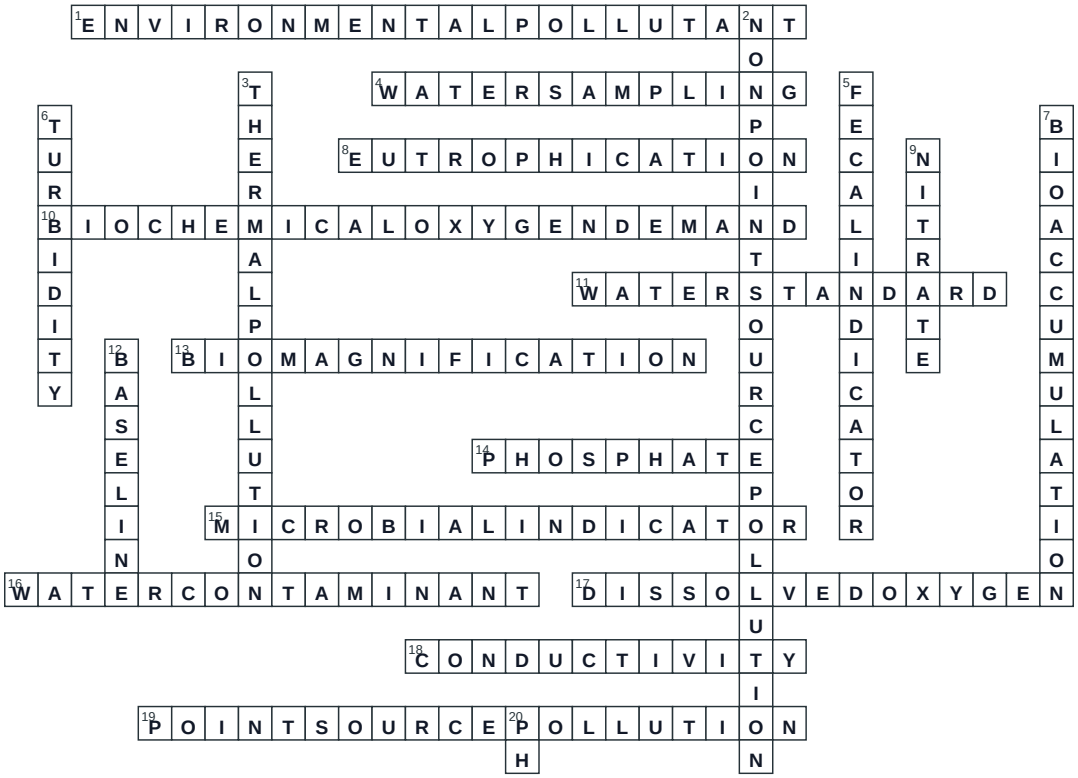
20. Scale that indicates how acidic or basic a solution is

Water Quality Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

1. Environmental Pollutant
4. Water sampling
8. Eutrophication
10. Biochemical Oxygen Demand
11. Water standard
13. Biomagnification
14. Phosphate
15. Microbial indicator
16. Water contaminant
17. Dissolved Oxygen
18. Conductivity

ACROSS (continued)

19. Point-source pollution

DOWN

2. Nonpoint-source pollution
3. Thermal Pollution
5. Fecal Indicator
6. Turbidity
7. Bioaccumulation
9. Nitrate
12. Baseline
20. pH
