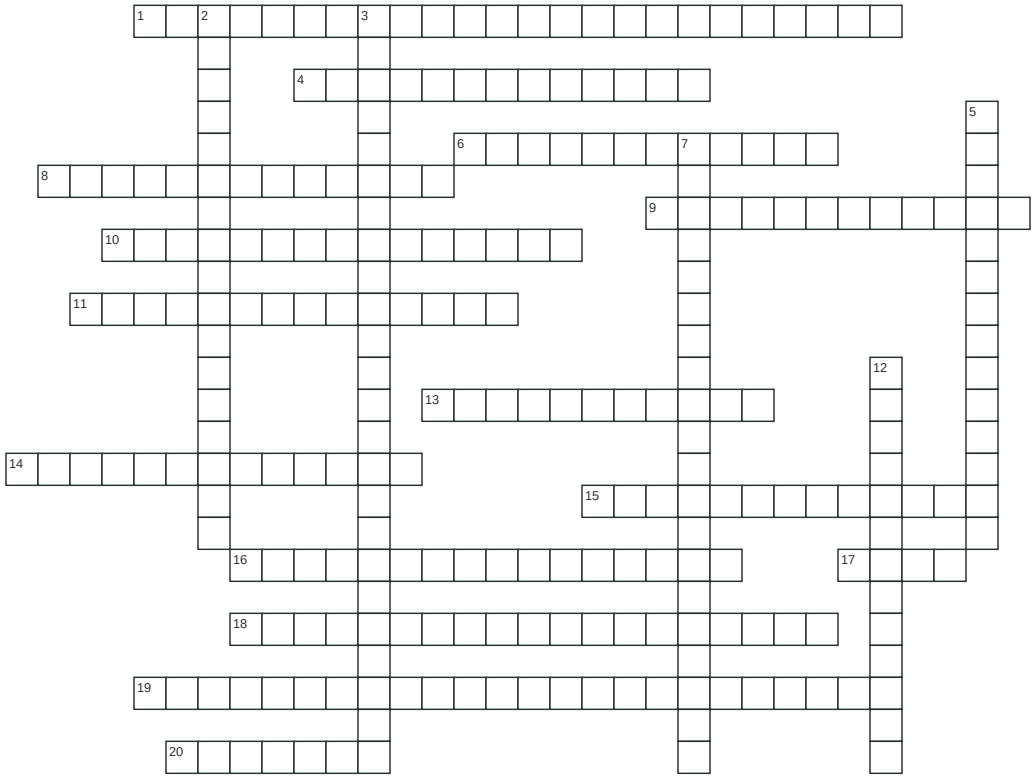
Magnetism and Electromagnetism Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. Producing an electric effect through changing magnetic flux

4. Region where magnetic forces can act on magnets or moving charges.

6. Region near an end of a magnet where its magnetic effect is strongest.

8. Device that converts electrical energy into mechanical energy

9. Measure of magnetic field passing through a specified area.

10. Creates a magnetic field around a wire

11. Region in a material where many atomic magnetic moments align.

13. Changing current in one coil induces voltage in another coil through changing magnetic flux

14. Measure of the intensity of a magnetic field.

15. Alignment of magnetic domains that gives a material a net magnetic effect.

16. Designation of a magnet’s north-seeking and south-seeking ends.

ACROSS (continued)

17. Wire wound into loops to strengthen the magnetic field produced by current.

18. Attraction or repulsion between magnets or magnetic materials.

19. A turbine spins a generator during electricity production. What supplies the mechanical energy

20. Instrument whose magnetic needle aligns with a local magnetic field.

DOWN

2. Device that converts mechanical energy into electrical energy

3. Happens to a coil's magnetic polarity when its current direction reverses

5. Current produced when magnetic flux through a conducting loop changes.

7. Variation in magnetic field through a loop that can induce voltage.

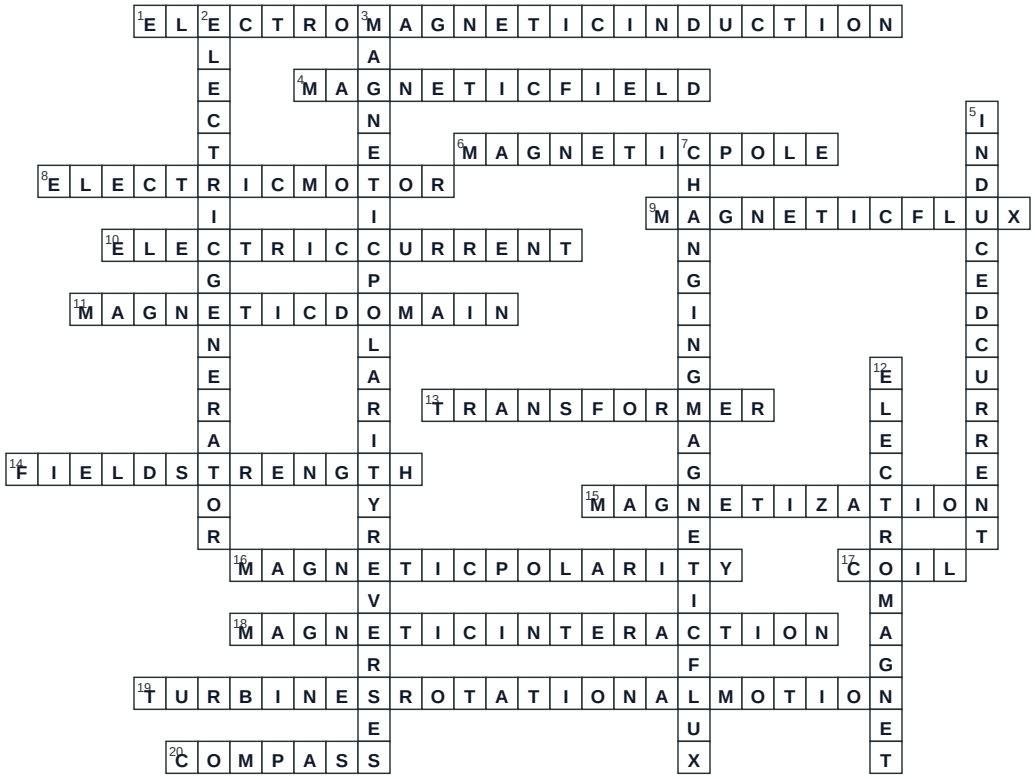
12. A device whose magnetism is produced by electric current

Magnetism and Electromagnetism Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

1. Electromagnetic Induction
4. Magnetic field
6. Magnetic pole
8. Electric Motor
9. Magnetic flux
10. Electric Current
11. Magnetic domain
13. Transformer
14. Field strength
15. Magnetization
16. Magnetic polarity

ACROSS (continued)

17. Coil
18. Magnetic interaction
19. Turbine's Rotational Motion
20. Compass

DOWN

2. Electric Generator
3. Magnetic Polarity Reverses
5. Induced current
7. Changing magnetic flux
12. Electromagnet
