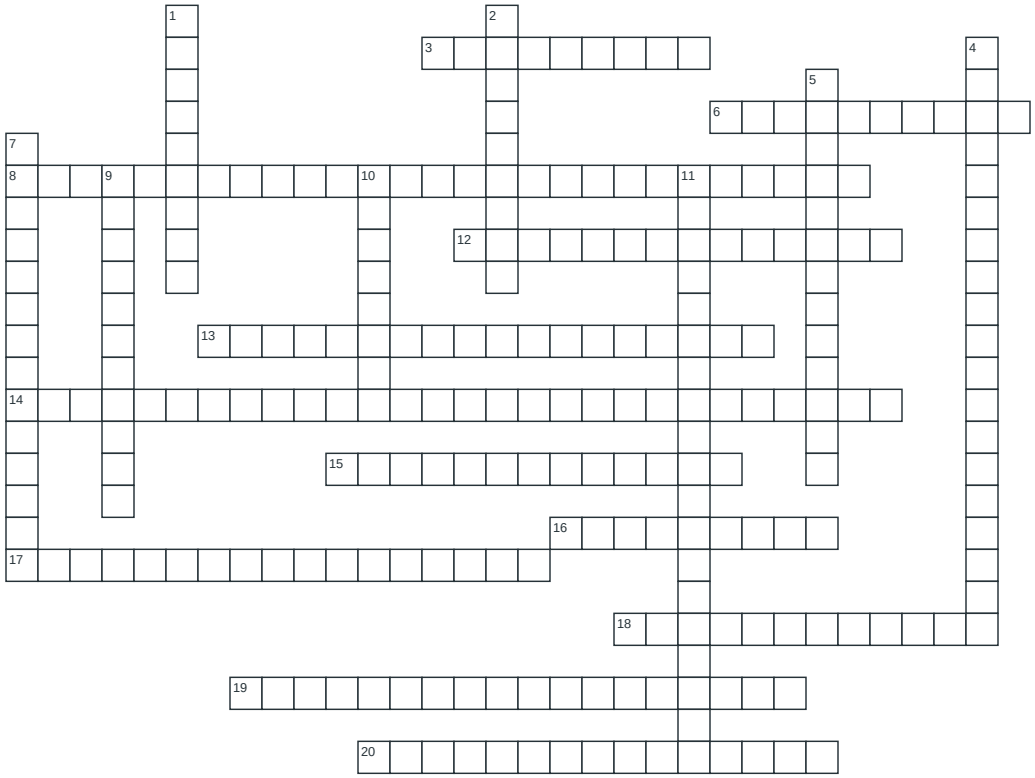
Static Electricity Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

3. Material in which electric charges can move relatively freely.

6. Relationship describing electric force as dependent on charge and separation.

8. Change in stored energy per unit charge between two locations.

12. Net electric charge resulting when an object has fewer electrons than protons.

13. Attractive or repulsive force between electric charges.

14. Net charge is conserved in an isolated system

15. Region in which a charged object experiences electric force.

16. Connection that lets charge move between an object and Earth.

17. Stored energy per unit charge at a location in an electric field.

18. Redistribution of charge within an object without necessarily changing its net charge.

ACROSS (continued)

19. Principle that total electric charge in an isolated system remains constant.

20. Transfer of electric charge through direct contact.

DOWN

1. Particles usually move between objects during static charging

2. Material in which electric charge does not move freely through the bulk.

4. Charge redistribution caused by a nearby charged object without direct contact.

5. The repulsive force decreases

7. Net electric charge resulting when an object has more electrons than protons.

9. Becomes one-fourth as large

10. Negatively charged subatomic particle.

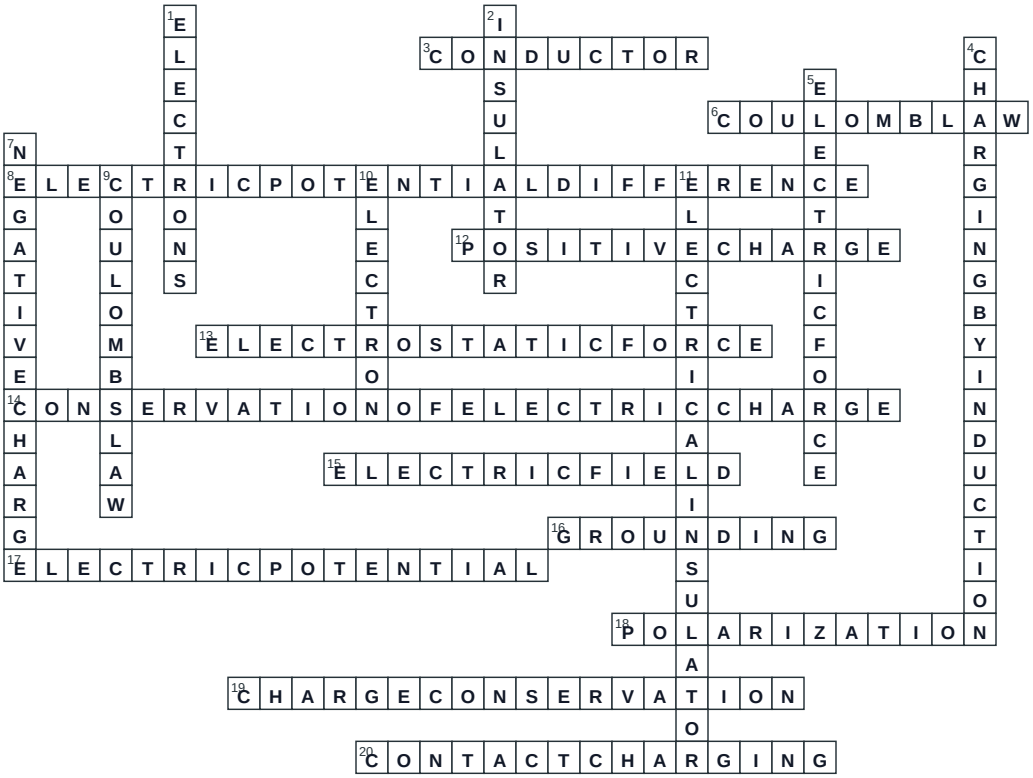
11. A material in which charge does not move freely through the bulk

Static Electricity Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

3. Conductor
6. Coulomb law
8. Electric potential difference
12. Positive charge
13. Electrostatic force
14. Conservation Of Electric Charge
15. Electric field
16. Grounding
17. Electric potential
18. Polarization
19. Charge conservation

ACROSS (continued)

20. Contact charging

DOWN

1. Electrons
2. Insulator
4. Charging by induction
5. Electric Force
7. Negative charge
9. Coulomb’s Law
10. Electron
11. Electrical Insulator
