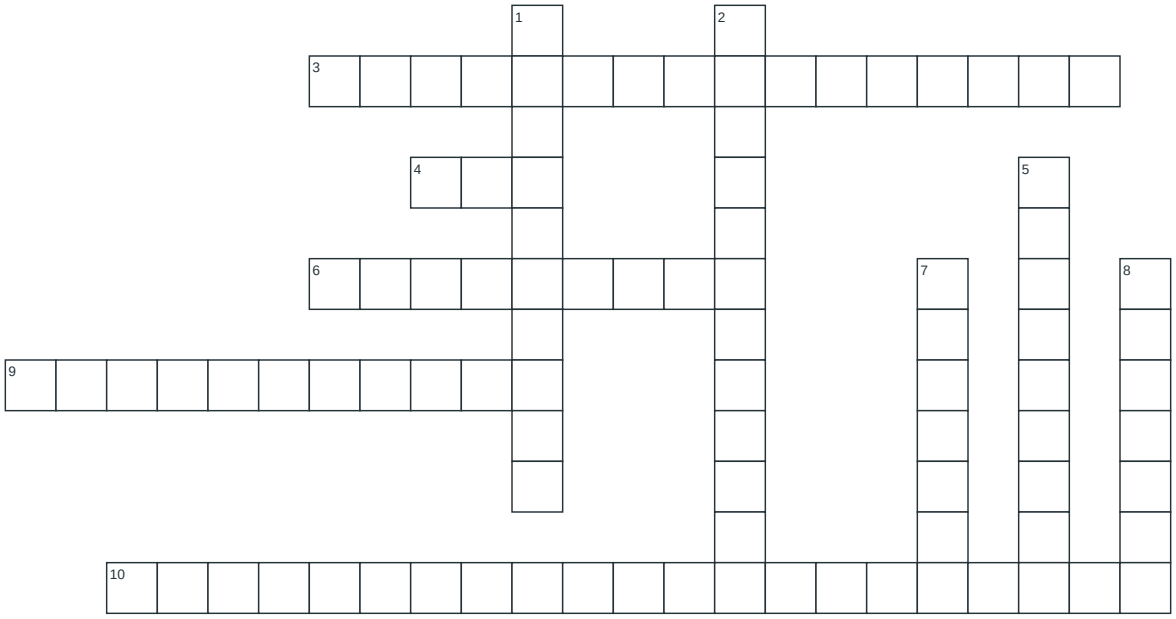
Cell Division: Mitosis and Meiosis Crossword

Easy | 10 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

3. Identical chromosome copies joined before they separate

4. Molecule that stores hereditary information in most cells

6. Meiotic stage when homologous chromosomes pair and crossing over can occur

9. Division of the cytoplasm into daughter cells

10. Chromosome pair with the same genes at corresponding locations

DOWN

1. Meiotic stage when homologous chromosome pairs align at the cell center

2. Exchange of DNA between nonsister chromatids of homologous chromosomes

5. Cell contents outside the nucleus and inside the plasma membrane.

7. Cell division that produces haploid cells from a diploid cell

8. Nuclear division that usually preserves chromosome number

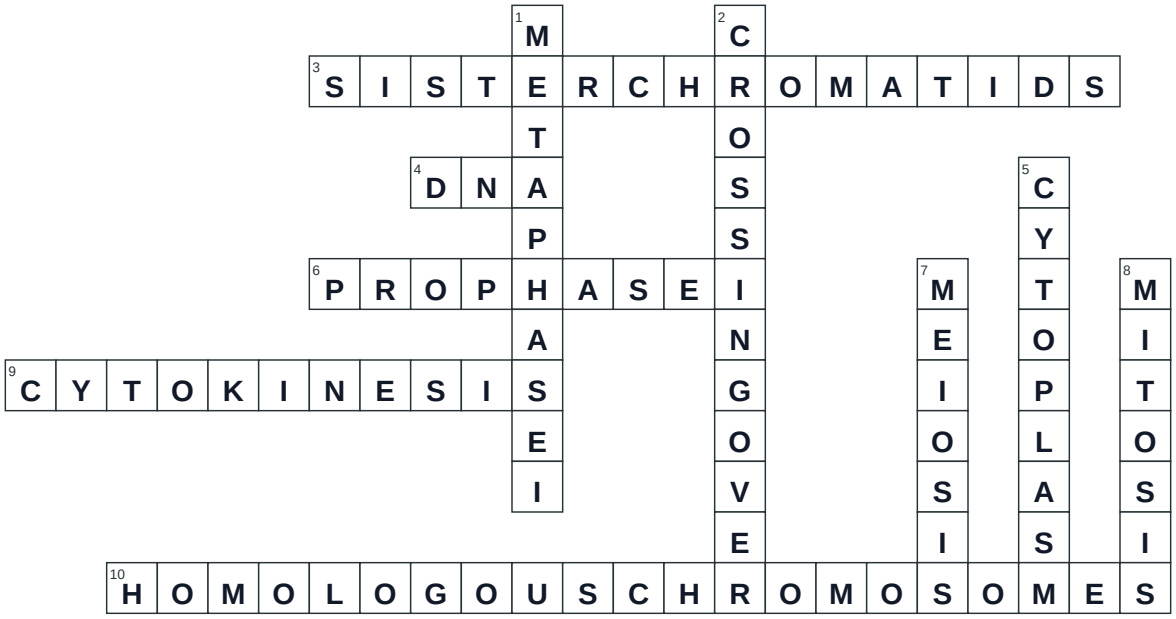
Cell Division: Mitosis and Meiosis Crossword

Easy | 10 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

3. Sister Chromatids
4. DNA
6. Prophase I
9. Cytokinesis
10. Homologous Chromosomes

DOWN

1. Metaphase I
2. Crossing Over
5. Cytoplasm
7. Meiosis
8. Mitosis

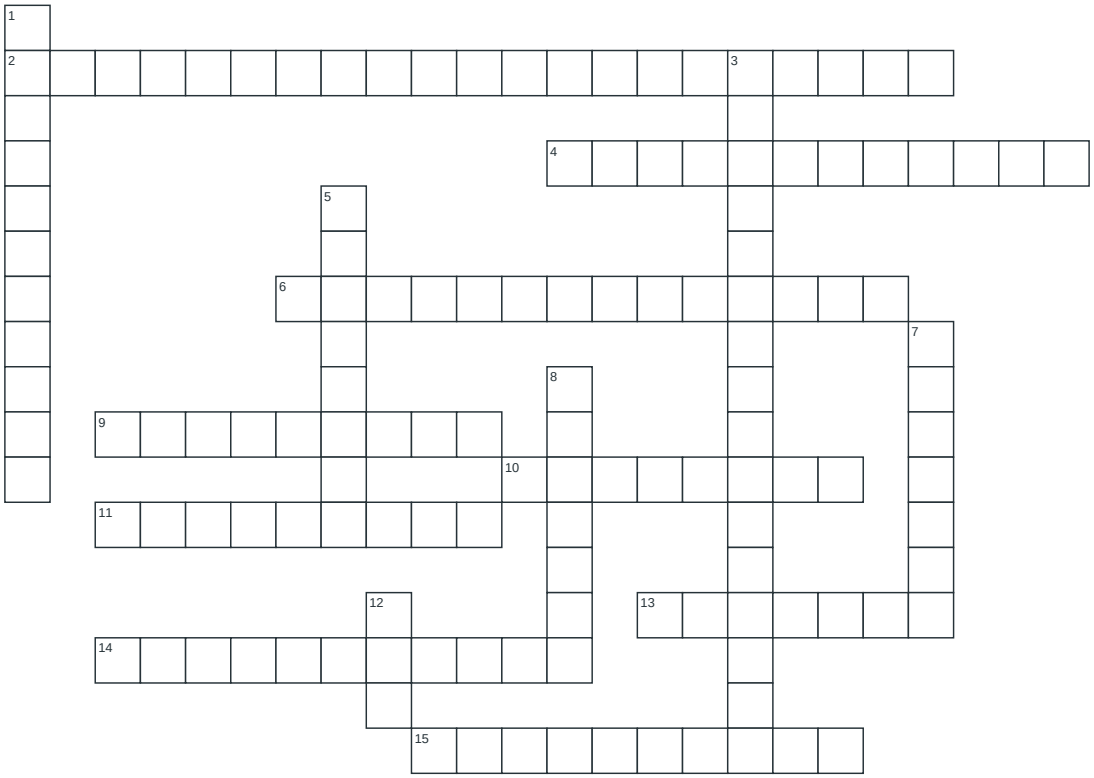
Cell Division: Mitosis and Meiosis Crossword

Medium | 15 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

2. Chromosome pair with the same genes at corresponding locations

4. Exchange of DNA between nonsister chromatids of homologous chromosomes

6. Boundary that regulates exchange between a cell and its surroundings.

9. Meiotic stage when homologous chromosomes pair and crossing over can occur

10. Cell structure that assembles proteins.

11. Cell contents outside the nucleus and inside the plasma membrane.

13. Nuclear division that usually preserves chromosome number

14. Division of the cytoplasm into daughter cells

ACROSS (continued)

15. Meiotic stage when homologous chromosome pairs align at the cell center

DOWN

1. Organelle where photosynthesis occurs in plants and algae.

3. Identical chromosome copies joined before they separate

5. Rigid outer layer that supports many plant, fungal, and bacterial cells.

7. Membrane-bound organelle that contains most eukaryotic DNA.

8. Cell division that produces haploid cells from a diploid cell

12. Molecule that stores hereditary information in most cells

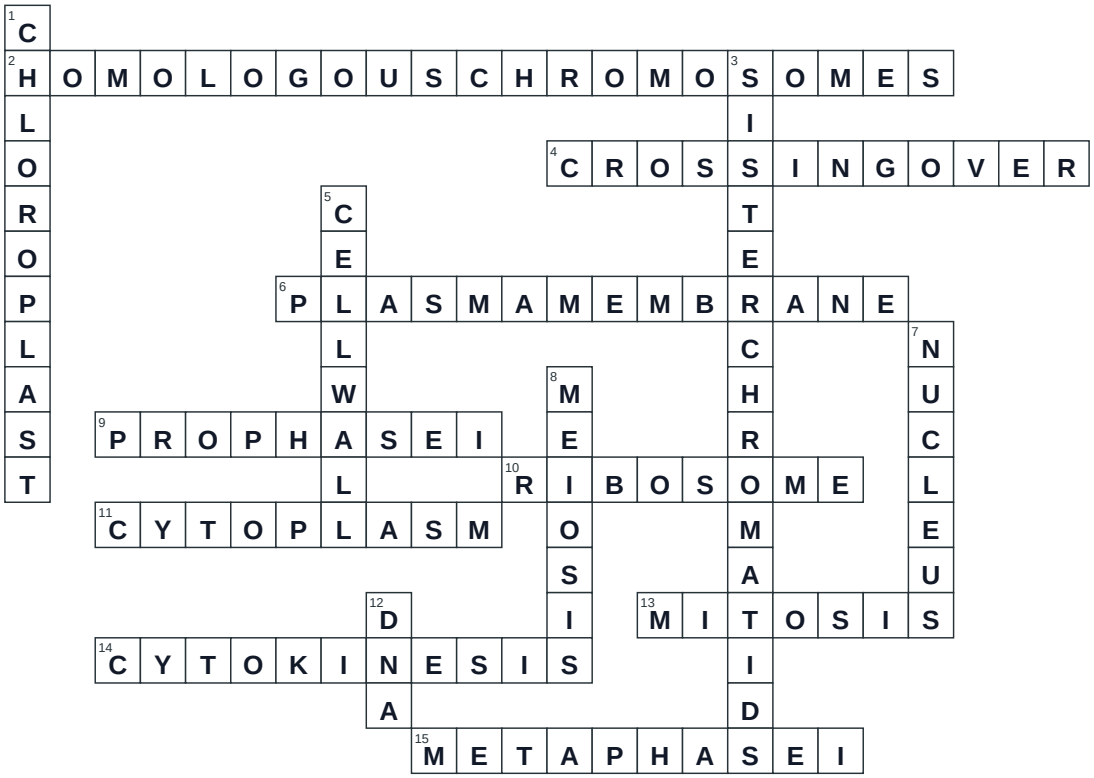
Cell Division: Mitosis and Meiosis Crossword

Medium | 15 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

2. Homologous Chromosomes
4. Crossing Over
6. Plasma membrane
9. Prophase I
10. Ribosome
11. Cytoplasm
13. Mitosis
14. Cytokinesis

ACROSS (continued)

15. Metaphase I

DOWN

1. Chloroplast
3. Sister Chromatids
5. Cell wall
7. Nucleus
8. Meiosis
12. DNA

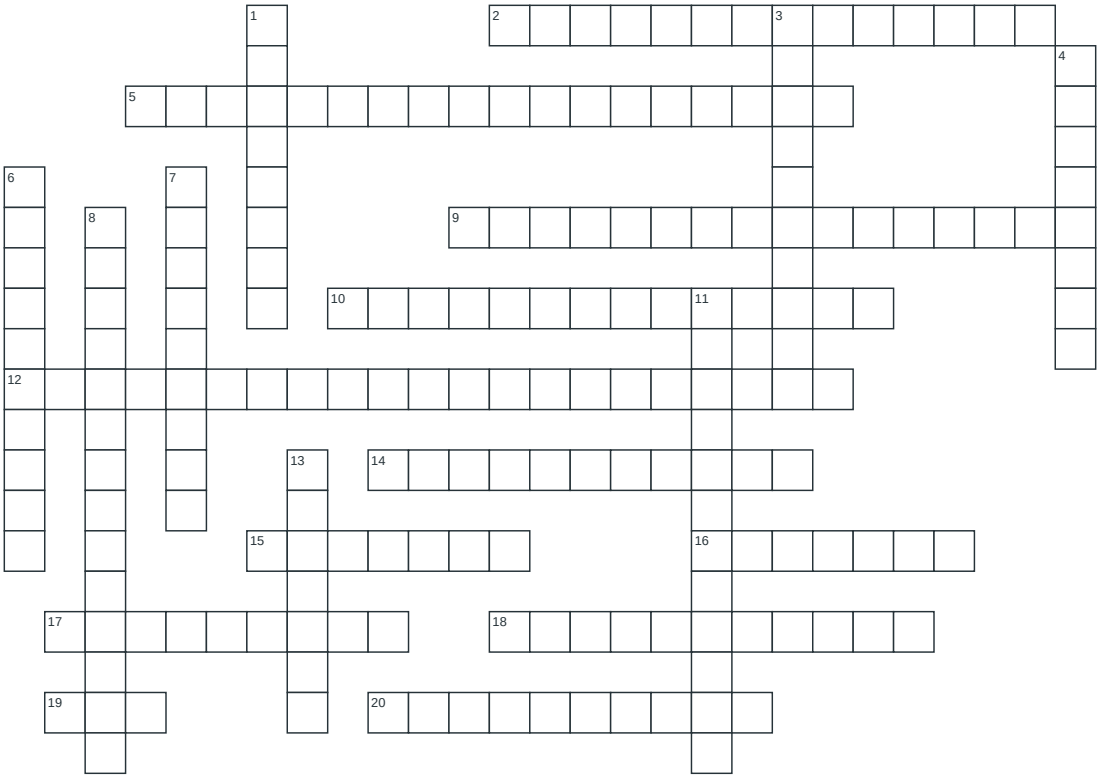
Cell Division: Mitosis and Meiosis Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

2. Organelle that modifies, sorts, and packages many proteins.

5. Process by which cells develop structures suited to particular functions.

9. Identical chromosome copies joined before they separate

10. Plant-cell compartment that stores water and helps maintain pressure.

12. Chromosome pair with the same genes at corresponding locations

14. Division of the cytoplasm into daughter cells

15. Nuclear division that usually preserves chromosome number

16. Membrane-bound organelle that contains most eukaryotic DNA.

17. Meiotic stage when homologous chromosomes pair and crossing over can occur

18. Organelle where photosynthesis occurs in plants and algae.

ACROSS (continued)

19. Molecule that stores hereditary information in most cells

20. Meiotic stage when homologous chromosome pairs align at the cell center

DOWN

1. Rigid outer layer that supports many plant, fungal, and bacterial cells.

3. Cell type that lacks a membrane-bound nucleus.

4. Cell structure that assembles proteins.

6. States that living things are made of cells and that cells come from existing cells.

7. Cell contents outside the nucleus and inside the plasma membrane.

8. Boundary that regulates exchange between a cell and its surroundings.

11. Exchange of DNA between nonsister chromatids of homologous chromosomes

13. Cell division that produces haploid cells from a diploid cell

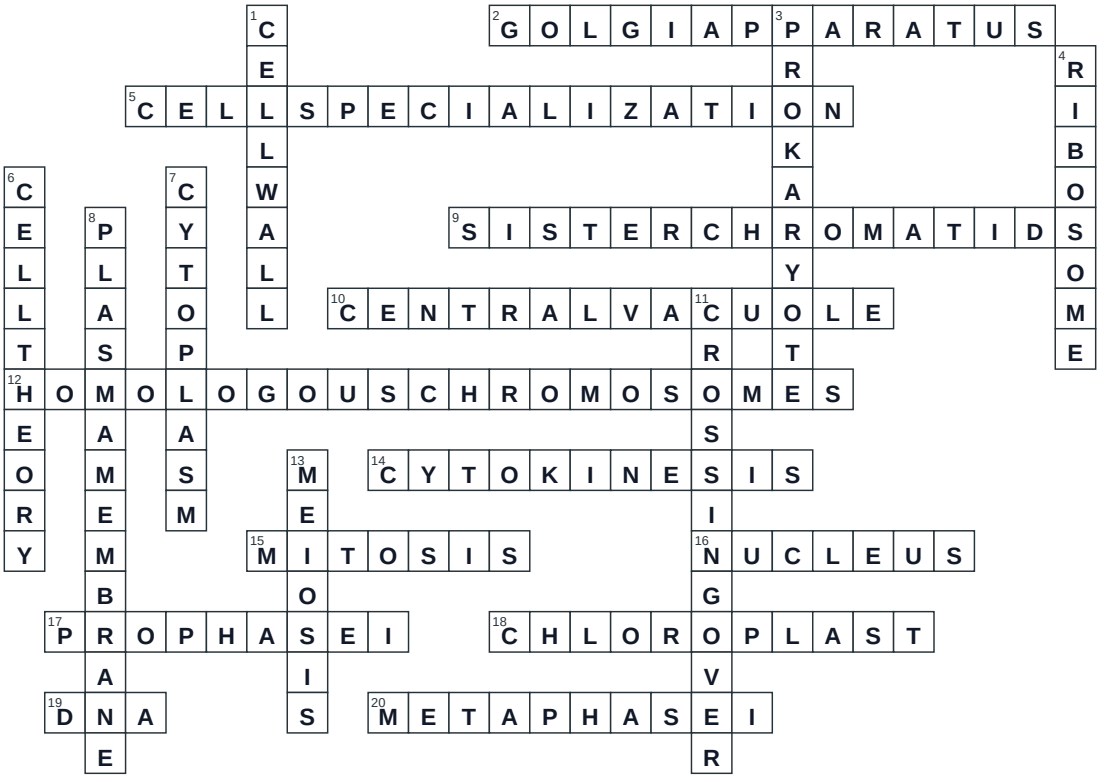
Cell Division: Mitosis and Meiosis Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

2. Golgi apparatus
5. Cell specialization
9. Sister Chromatids
10. Central vacuole
12. Homologous Chromosomes
14. Cytokinesis
15. Mitosis
16. Nucleus
17. Prophase I
18. Chloroplast
19. DNA

ACROSS (continued)

20. Metaphase I

DOWN

1. Cell wall
3. Prokaryote
4. Ribosome
6. Cell theory
7. Cytoplasm
8. Plasma membrane
11. Crossing Over
13. Meiosis
