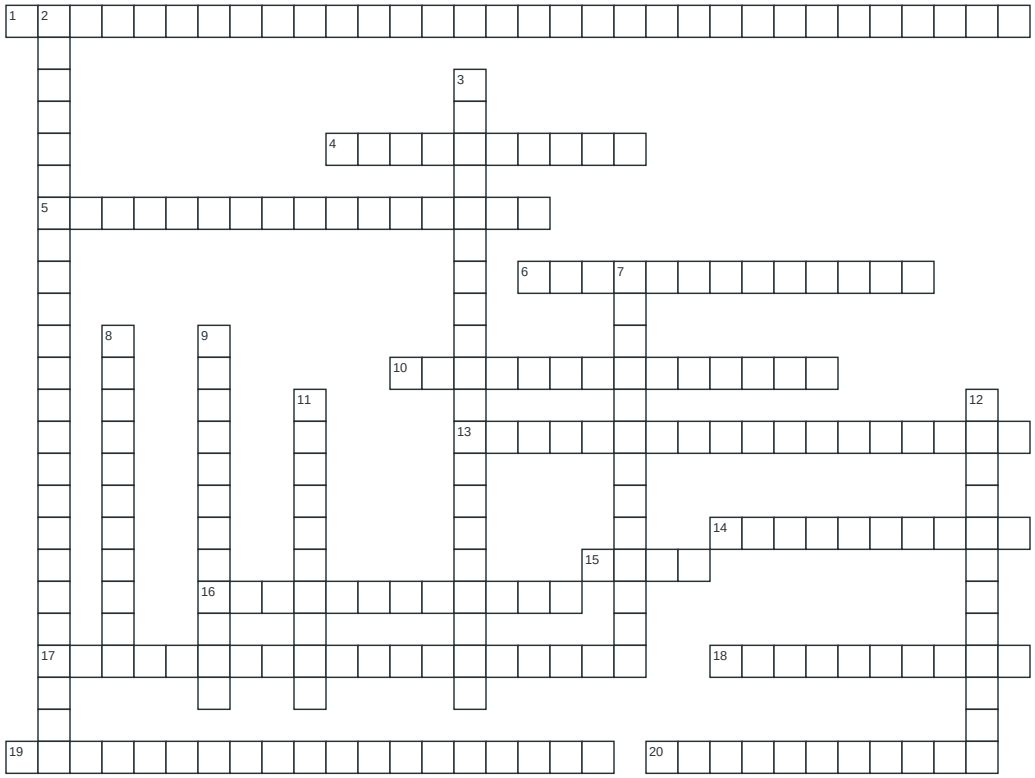
Heat and Thermal Energy Crossword

Hard | 20 clues | Student Worksheet

Name: _____ Date: _____

Directions: Use the clues to complete the grid. Omit spaces, punctuation, and hyphens.



ACROSS

1. A condition of equal temperature with no net heat transfer between them

4. Energy transfer associated with bulk movement of a fluid

5. Energy transfer by electromagnetic waves

6. Energy transferred because of a temperature difference

10. Movement of energy from one object or region to another.

13. Condition in which objects have equal temperature and there is no net heat transfer.

14. Energy transferred during a phase change without changing temperature.

15. Energy transferred between objects because of a temperature difference.

16. Energy required to raise the temperature of an entire object by one degree.

17. Measure of how readily a material transfers thermal energy.

ACROSS (continued)

18. Material or design that reduces the rate of heat transfer.

19. Change in temperature across a distance that can drive heat transfer.

20. Measure related to the average kinetic energy of particles

DOWN

2. Way does net heat transfer occur spontaneously between contacting objects

3. Energy required to raise the temperature of a unit mass by one degree

7. Energy associated with the motion and interactions of particles in a substance.

8. Physical change from one state of matter to another.

9. Energy needed per unit mass to raise a substance one degree.

11. Energy transfer through interactions within or between contacting materials

12. Upward force a fluid exerts on an object within it.

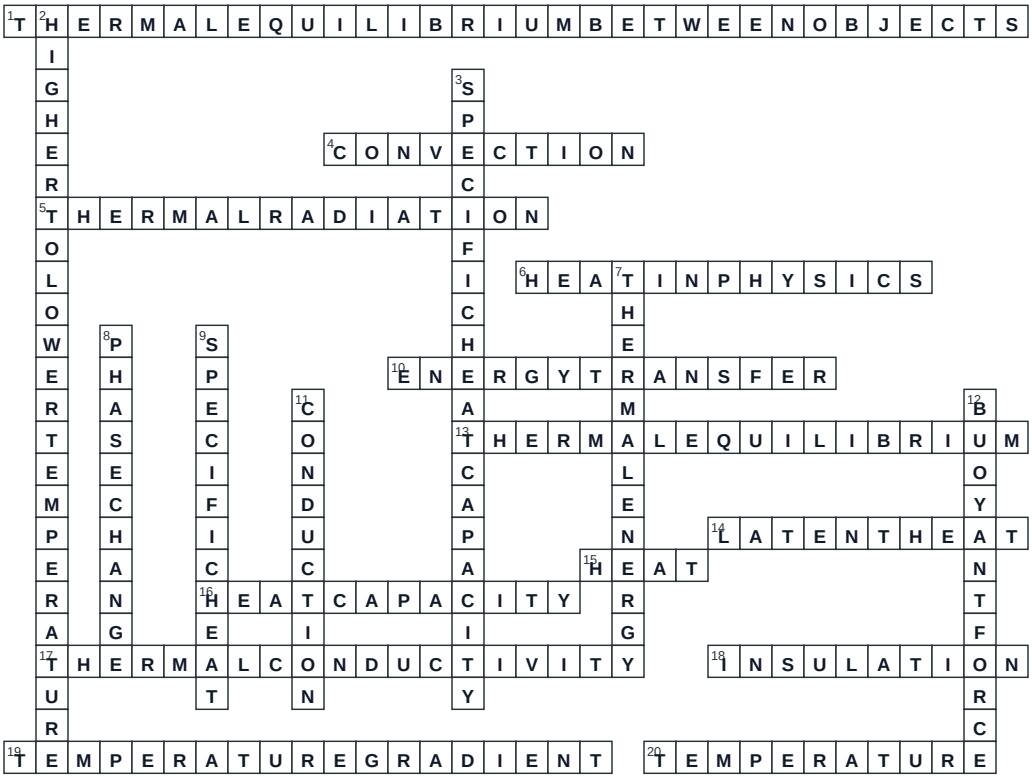
Heat and Thermal Energy Crossword

Hard | 20 clues | Teacher Answer Key

TEACHER ANSWER KEY

Completed grid and numbered answers. Spaces and punctuation are omitted in the grid.



ACROSS

1. Thermal Equilibrium Between Objects
4. Convection
5. Thermal Radiation
6. Heat In Physics
10. Energy transfer
13. Thermal equilibrium
14. Latent heat
15. Heat
16. Heat capacity
17. Thermal conductivity
18. Insulation

ACROSS (continued)

19. Temperature gradient
20. Temperature

DOWN

2. Higher To Lower Temperature
3. Specific Heat Capacity
7. Thermal energy
8. Phase change
9. Specific heat
11. Conduction
12. Buoyant force
